The Dynamic Dance Nonvocal Communication In African Great Apes:

The Dynamic Dance Barbara J. KING, Barbara J King, 2009-06-30 Mother and infant negotiate over food two high status males jockey for power female kin band together to get their way It happens among humans and it happens among our closest living relatives in the animal kingdom the great apes of Africa In this eye opening book we see precisely how such events unfold in chimpanzees bonobos and gorillas through a spontaneous mutually choreographed dance of actions gestures and vocalizations in which social partners create meaning and come to understand each other Using dynamic systems theory an approach employed to study human communication Barbara King is able to demonstrate the genuine complexity of apes social communication and the extent to which their interactions generate meaning As King describes apes create meaning primarily through their body movements and go well beyond conveying messages about food mating or predators Readers come to know the captive apes she has observed and others across Africa as well and to understand the process of creating social meaning This new perspective not only acquaints us with our closest living relatives but informs us about a possible pathway for the evolution of language in our own species King s theory challenges the popular idea that human language is instinctive with rules and abilities hardwired into our brains Rather The Dynamic Dance suggests language has its roots in the gestural building up of meaning that was present in the ancestor we shared with the great apes and that we continue to practice to this day

The Animal Mind Kristin Andrews, 2014-10-30 The study of animal cognition raises profound questions about the minds of animals and philosophy of mind itself Aristotle argued that humans are the only animal to laugh but in recent experiments rats have also been shown to laugh In other experiments dogs have been shown to respond appropriately to over two hundred words in human language In this introduction to the philosophy of animal minds Kristin Andrews introduces and assesses the essential topics problems and debates as they cut across animal cognition and philosophy of mind She addresses the following key topics what is cognition and what is it to have a mind What questions should we ask to determine whether behaviour has a cognitive basis the science of animal minds explained ethology behaviourist psychology and cognitive ethology rationality in animals animal consciousness what does research into pain and the emotions reveal What can empirical evidence about animal behaviour tell us about philosophical theories of consciousness does animal cognition involve belief and concepts do animals have a Language of Thought animal communication other minds do animals attribute mindedness to other creatures moral reasoning and ethical behaviour in animals animal cognition and memory Extensive use of empirical examples and case studies is made throughout the book These include Cheney and Seyfarth s vervet monkey research Thorndike s cat puzzle boxes Jensen s research into humans and chimpanzees and the ultimatum game Pankseep and Burgdorf s research on rat laughter and Clayton and Emery s research on memory in scrub jays Additional features such as chapter summaries annotated further reading and a glossary make this an indispensable introduction to those teaching philosophy of mind animal cognition It will also be an excellent

Burrows, 2014 Multimodal approach to primate communication with focus on its cognitive foundations and how this relates to theories of language evolution **Kanzi's Primal Language** P. Segerdahl, W. Fields, S. Savage-Rumbaugh, 2005-08-05 Sue Savage Rumbaugh's work on the language capabilities of the bonobo Kanzi has intrigued the world because of its far reaching implications for understanding the evolution of the human language This book takes the reader behind the scenes of the filmed language tests It argues that while the tests prove that Kanzi has language the even more remarkable manner in which he originally acquired it spontaneously in a culture shared with humans calls for a rethinking of language emphasizing its primal cultural dimensions **Reading the Hebrew Bible with Animal Studies** Ken Stone, 2023-05-25 An excellent introduction to the field of animal studies the applications of these ideas to biblical passages illuminate the text in new ways Brandon R Grafius *Horizons in Biblical Theology* Animal studies may be a recent academic development but our fascination with animals is nothing new Surviving cave paintings are of animal forms and closer to us as Ken Stone points out animals populate biblical literature from beginning to end This book explores the significance of animal studies for the interpretation of the Hebrew Bible Combined with biblical scholarship animal studies sheds useful light on animals animal symbolism and the relations among animals humans and God not only for those who study biblical literature and its ancient context but for contemporary readers concerned with environmental social and animal ethics Without the presence of domesticated and wild animals neither biblical traditions nor the religions that make use of the Bible would exist in their current forms Although parts of the Bible draw a clear line between humans and animals other passages complicate that line in multiple ways and challenge our assumptions about the roles animals play therein Engaging influential thinkers including Jacques Derrida Donna Haraway and other experts in animal and ecological studies *Reading the Hebrew Bible with Animal Studies* shows how prehumanist texts reveal unexpectedly relevant dynamics and themes for our posthumanist age Stone's ecological sensibilities theoretical acumen and incisive exegetical arguments open up fresh perspectives Stephen D Moore *The Theological School* Drew University This monograph is poised to become a key work in the field Anne L tourneau *Reading Religion* Groundbreaking Carol J Dempsey *OP Horizons* **Developments in Primate Gesture Research** Simone Pika, Katja Liebal, 2012 The book is a themed mutually referenced collection of articles from a very high powered set of authors based on the workshop on Current developments in non human primate gesture research which was held in July 2010 at the European University Viadrina Frankfurt Oder Germany The motivation for this book following on from the motivation for the workshop series was to present the state of the art in non human primate gesture research with a special emphasis on its history interdisciplinary perspectives developments and future directions This book provides for the first time in a single volume the most recent work on comparative gestural signaling by many of the major scholars in the field such as W D Hopkins D Leavens T Racine J van Hooff and S Wilcox in alphabetical order **Embodied Social Cognition** Jessica

Lindblom, 2015-07-03 This book clarifies the role and relevance of the body in social interaction and cognition from an embodied cognitive science perspective Theories of embodied cognition have during the last decades offered a radical shift in explanations of the human mind from traditional computationalism to emphasizing the way cognition is shaped by the body and its sensorimotor interaction with the surrounding social and material world This book presents a theoretical framework for the relational nature of embodied social cognition which is based on an interdisciplinary approach that ranges historically in time and across different disciplines It includes work in cognitive science artificial intelligence phenomenology ethology developmental psychology neuroscience social psychology linguistics communication and gesture studies The theoretical framework is illustrated by empirical work that provides some detailed observational fieldwork on embodied actions captured in three different episodes of spontaneous social interaction and cognition in situ Furthermore the theoretical contributions and implications of the study of embodied social cognition are discussed and summed up Finally the issue what it would take for an artificial system to be socially embodied is addressed and discussed as well as the practical relevance for applications to artificial intelligence AI and socially interactive technology

Before the Law Cary Wolfe, 2013 Animal studies and biopolitics are two of the most dynamic areas of interdisciplinary scholarship but until now they have had little to say to each other Bringing these two emergent areas of thought into direct conversation in Before the Law Cary Wolfe fosters a new discussion about the status of nonhuman animals and the shared plight of humans and animals under biopolitics Wolfe argues that the human animal distinction must be supplemented with the central distinction of biopolitics the difference between those animals that are members of a community and those that are deemed killable but not murderable From this understanding we can begin to make sense of the fact that this distinction prevails within both the human and animal domains and address such difficult issues as why we afford some animals unprecedented levels of care and recognition while subjecting others to unparalleled forms of brutality and exploitation Engaging with many major figures in biopolitical thought from Heidegger Arendt and Foucault to Agamben Esposito and Derrida Wolfe explores how biopolitics can help us understand both the ethical and political dimensions of the current questions surrounding the rights of animals

Body - Language - Communication. Volume 1 Cornelia Müller, Alan Cienki, Ellen Fricke, Silva Ladewig, David McNeill, Sedinha Tessendorf, 2013-10-14 Volume I of the handbook presents contemporary multidisciplinary historical theoretical and methodological aspects of how body movements relate to language It documents how leading scholars from different disciplinary backgrounds conceptualize and analyze this complex relationship Five chapters and a total of 72 articles present current and past approaches including multidisciplinary methods of analysis The chapters cover I How the body relates to language and communication Outlining the subject matter II Perspectives from different disciplines III Historical dimensions IV Contemporary approaches V Methods Authors include Michael Arbib Janet Bavelas Marino Bonaiuto Paul Bouissac Judee Burgoon Martha Davis Susan Duncan Konrad Ehlich Nick Enfield Pierre Feyereisen Raymond W Gibbs Susan Goldin Meadow

Uri Hadar Adam Kendon Antja Kennedy David McNeill Lorenza Mondada Fernando Poyatos Klaus Scherer Margret Selting Jrgen Streeck Sherman Wilcox Jeffrey Wollock Jordan Zlatev **Joint Attention** Axel Seemann, 2012-01-20 Interdisciplinary perspectives on definitional concerns underlying mechanisms and the functional significance of joint attention Academic interest in the phenomenon of joint attention the capacity to attend to an object together with another creature has increased rapidly over the past two decades Yet it isn't easy to spell out in detail what joint attention is how it ought to be characterized and what exactly its significance consists in The writers for this volume address these and related questions by drawing on a variety of disciplines including developmental and comparative psychology philosophy of mind and social neuroscience The volume organizes their contributions along three main themes definitional concerns such as the question of whether or not joint attention should be understood as an irreducibly basic state of mind processes and mechanisms obtaining on both the neural and behavioral levels and the functional significance of joint attention in particular the role it plays in comprehending spatial perspectives and understanding other minds The collected papers present new work by leading researchers on one of the key issues in social cognition They demonstrate that an adequate theory of joint attention is indispensable for a comprehensive account of mind
