Jayne White, 2020-01-01 This book provides a philosophical socio political and theoretical understanding of the notion of Becoming in the context of the related concepts and in contemplation of the notion of Being Deriving from different traditions from various countries these concepts act as windows on contemporary early years settings and communities around the world where adults map out infant becomings This book is a valuable resource for early childhood educators students professionals researchers and policy makers around the globe who seek to understand the locatedness of infant becomings in space and time *iPads in the Early Years* Michael Dezuanni, Karen Dooley, Sandra Gattenhof, Linda Knight, 2015-01-09 Digital devices such as smart phones and tablet computers are becoming commonplace

in young children's lives for play, entertainment, learning and communication. Recently there has been a great deal of focus on the educational potential of these devices in both formal and informal educational settings. There is now an abundance of educational apps available to children, parents and teachers which claim to enhance children's early literacy and numeracy development, but to date there has been very little formal investigation of the educational potential of these devices. This book discusses the impact on children's learning when iPads were introduced in three very different early years settings in Brisbane, Australia. It outlines how researchers worked with pre-school teachers and parents to explore how iPads can assist with letter and word recognition, the development of oral literacy and digital literacies, and talk around play. Chapters consider the possibilities for using iPads for creativity and arts education through photography, storytelling, drawing, music creation and audio recording, and critically examine the literacies enabled by educational software available on iPads and the relationship between digital play and literacy development. iPads in the Early Years provides exciting insights into children's digital culture and learning in the age of the iPad. It will be key reading for researchers, research students and teacher educators focusing on the early years as well as those with an interest in the role of ICTS and particularly tablet computers in education.

Supporting Identity, Diversity And Language In The Early Years Siraj-Blatchford, Iram, Clarke, Priscilla, 2000-06-01. This book provides clear evidence and practical guidance on how to develop young children's emerging language, especially those children who have English as an additional language, and how to generate, activate and assess curriculum for diversity. The book focuses on all children's learning for cultural diversity. Practical advice, real examples and staff activities bring the book to life.

Trinity Evangelical Divinity School: The Early Years Scott Manetsch, 2014-05-01. The 2013-14 academic year marks the 50th anniversary of the transformation of Trinity Theological Seminary into Trinity Evangelical Divinity School from a small denominational seminary into a large internationally recognized theological institution. This booklet, written for the 50th Anniversary Celebration event, traces the pivotal early years of the 1960s when that vision began to take shape.

The Project Approach in Early Years Provision Marianne Sargent, 2014-01-07. The Project Approach in Early Years Provision is designed to help early years students, practitioners and managers understand and manage project work with young children. The project approach is designed to enable early educators to ensure young children are learning in the best possible way by providing motivating learning opportunities. Put the project approach into practice using the included resources with adaptable and printable planning and observation forms. Link the approach to the requirements of all four British early years curricula. Develop children's personal and social skills by encouraging collaboration with others. Provide a meaningful context for children to practice their literacy and numeracy skills. Promote sustained shared thinking by facilitating projects that involve children in active investigation, discussion and debate. Give each child the freedom to learn according to their individual needs, interests, aptitudes and abilities.
