The Earth Beneath A Critical Guide To Green Theology:

The Earth Beneath Ian Ball,1992-01-01 *A Political Theology of Nature* Peter Scott,2003-03-06 This book argues that the modern separation of humanity from nature can be traced to the displacement of the triune God Locating the source of our current ecological crisis in this separation Peter Scott argues that it can only be healed within theology through a revival of a Trinitarian doctrine of creation interacting with political philosophies of ecology Drawing insights from deep ecology ecofeminism and social and socialist ecologies Scott proposes a common realm of God nature and humanity Both Trinitarian and political the theology of this common realm is worked out by reference to Christ and Spirit Christ s resurrection is presented as the liberation and renewal of ecological relations in nature and society the movement of the Holy Spirit is understood as the renewal of fellowship between humanity and nature through ecological democracy and the Eucharist is proposed as the principal political resource Christianity offers for an ecological age Christianity and Ecological Theology E. M. Conradie,2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa Bible and Justice Matthew J. M. Coomber,2016-04-01 The Bible contains a variety of passages that defend the poor and champion the cause of the oppressed but are these ancient texts able to find a voice in confronting injustice in the modern world Bible and Justice examines the ways in which the Bible can speak to contemporary poverty environmental issues and state sponsored violence whilst exploring the difficulties that arise when ancient concepts of justice are applied to modern ideals The book covers a range of topics from human rights to deaf biblical interpretation and from hospitality to corporate globalization Broad and accessible Bible and Justice will be an invaluable resource for students of religious and biblical studies **The Ethics of Nature** Celia Deane-Drummond,2008-04-15 This accessible and timely book uses a Christian perspective to explore ethical debates about nature A detailed exploration of humanity s treatment of the natural world from a Christian perspective Covers a range of ethical debates including current controversies about the environment animal rights biotechnology consciousness and cloning Sets the immediate issues in the context of underlying theological and philosophical assumptions Complex scientific issues are explained in clear student friendly language The author develops her own distinctive ethical approach centred on the practice of wisdom Discusses key figures in the field including Peter Singer Aldo Leopold Tom Regan Andrew Linzey James Lovelock Anne Primavesi Rosemary Radford Ruether and Michael Northcott The author has held academic posts in both theology and plant science **A Companion to Environmental Philosophy** Dale Jamieson,2008-04-15 A Companion to Environmental Philosophy is a pioneering work in the burgeoning field of environmental philosophy This ground breaking volume contains thirty six original articles exemplifying the rich diversity of scholarship in this field Contains thirty six

original articles written by international scholars Traces the roots of environmental philosophy through the exploration of cultural traditions from around the world Brings environmental philosophy into conversation with other fields and disciplines such as literature economics ecology and law Discusses environmental problems that stimulate current debates

Ecological Hermeneutics David G. Horrell,Cherryl Hunt,Christopher Southgate,Francesca Stavropoulou,2010-06-02 Leading scholars reflect critically on the kinds of appeal to the Bible that have been made in environmental ethics and ecotheology and engage with biblical texts with a view towards exploring their contribution to an ecological ethics The essays explore the kind of hermeneutic necessary for such engagement to be fruitful for contemporary theology and ethics Crucial to such broad reflection is the bringing together of a range of perspectives biblical studies historical theology hermeneutics and theological ethics The thematic coherence of the book is provided by the running focus on the ways in which biblical texts have been or might be read This volume is not about ecotheology but is instead about ecological hermeneutics Indeed some essays show where biblical texts or particular approaches in the history of interpretation represent anthropocentric or even anti ecological moves One of the overall aims of the book is to suggest how and why an ecological hermeneutic might be developed and the kinds of interpretive choices that are required in such a development

Here For Our Children's Children? Adrian C. Armstrong,2016-04-05 This study reviews the many different bases for wanting to preserve the environment By seeing how protagonists approach the same situation from different assumptions some of the origins of environmental conflict may be established and ways of resolving conflict can be identified There are two major issues in environmental ethics The first asks whether the problems can be solved within current approaches or require instead lifestyle changes for the whole of western civilisation The second issue concerns why the environment should be valued This review identifies a series in increasingly stronger valuations that can be identified as 1 Hedonistic we protect the environment because we like it 2 Utilitarian the environment is valuable to us 3 Consequentialist we want to preserve things for other people now or future 4 Intrinsic The environment has virtue in its own right 5 Extrinsic we value the environment because it is of consequence to some thing else theistic a God Thirdly these insights are used to explore potential ways of resolving environmental conflicts notably by the recovery of democratic decision making at the right scale local national or even global

Ethics and Justice for the Environment Adrian Armstrong,2012-05-31 Examining the issues of ethics and justice as they apply to the environment this book starts from the observation that the parallel expositions of environmental ethics and environmental justice appear to have few points of contact Environmental justice is highly politicized and concerned with human access to the environment and the unequal exposure to environmental pollution It grew out of the US civil rights movement the liberal tradition of rights and Rawls description of justice as fairness It is thus almost exclusively anthropocentric and does not address the question of justice for the environment By contrast environmental ethical studies are a wide ranging collection of approaches that are concerned with caring for the earth and

the justifications for it but rarely consider the issue of justice Although the two movements do not come together at the theoretical level they do so at the grass roots activist level An essential component of this study is thus to consider both the issues of grass roots action and the application of the methods to actual case studies This book finds a common ground between these two strands and so to develop a unified statement of justice for the environment that includes the insights of both approaches particularly based on the capability ideas of justice developed by Martha Nussbaum

Visual Representations of the Arctic Markku Lehtimäki, Arja Rosenholm, Vlad Strukov, 2021-03-30 Privileging the visual as the main method of communication and meaning making this book responds critically to the worldwide discussion about the Arctic and the North addressing the interrelated issues of climate change ethics and geopolitics A multi disciplinary multi modal exploration of the Arctic it supplies an original conceptualization of the Arctic as a visual world encompassing an array of representations imaginings and constructions By examining a broad range of visual forms media and forms such as art film graphic novels maps media and photography the book advances current debates about visual culture The book enriches contemporary theories of the visual taking the Arctic as a spatial entity and also as a mode of exploring contemporary and historical visual practices including imaginary constructions of the North Original contributions include case studies from all the countries along the Arctic shore with Russian material occupying a large section due to the country s impact on the region
