The Health Marketplace New York City 1990 2010:

The Health Marketplace Eli Ginzberg, Health care provision in the United States remains a critical policy issue Despite large scale organizational transformations in hospitals changes in the ways that health care is delivered and changes in the relations between patients and the staffs who provide health care services health institutions remain financially unstable even as they have grown in size Mergers and new networks and systems have emerged and revenue streams continue to grow Experts no longer view such developments as holding the answer to continuing problems of the health care system Focusing on changes in the health care sector in New York City during the 1990s this volume considers physicians and other health care workers primary and ambulatory care sites and hospitals and medical centers It explores the impact of institutional realignments and managed care in New York City It examines the accelerated destabilization of health care financing and delivery at the end of the twentieth century in the nation at large as well as in New York State and New York City Ginzberg and his colleagues describe what might happen in the next decade in the nation's largest metropolis and locate the probable outcome in the space between these two extremes They focus on how the health marketplace may be altered by 2010 when it faces its greatest challenges a year before the first members of the baby boom generation become eligible for Medicare This literate and informative volume elucidates changes that have occurred in the health care sector during the decade of the 1990s and offers an expert assessment of what might happen over the next decade Policymakers health care officials and medical personnel will find this highly informative reading Eli Ginzberg is A Barton Hepburn Professor Emeritus at the Graduate School of Business and Director of the Eisenhower Center for the Conservation of Human Resources at Columbia University His work in social policy health care human resources the special needs of the poor the young and the aged place Ginzberg in a special category activist scholar rather than academic turned activist Howard Berliner is associate professor Program in Health Services Management and Policy Milano Graduate School of Management and Urban Policy New School for Social Research Panos Minogiannis is a political science doctoral candidate in the division of Sociomedical Sciences Columbia University and a research associate at the Eisenhower Center Miriam Ostow was the long term chief of health policy studies at the Eisenhower Center and co author of many of its earlier publications on health policy States Health Care and the Future Supply of Physicians Eli Ginzberg, Panos Minogiannis, Many different sectors of modern society influence the nation s healthcare system Government health insurance companies managed care organizations academic health centers the pharmaceutical industry and other groups all affect healthcare In the areas of medical access cost and quality the physician remains the key to the efficiency and effectiveness of healthcare services Eli Ginzberg and Panos Minogiannis in Ginzberg s final book examine the supply of health personnel in the United States They consider the ways it has been influenced by federal and state legislation healthcare financing the transformation of the hospital managed care and health trends in the last part of the twentieth century Through this historical approach the book identifies key

moments in U S health policy history that have led to problems in the geographical distribution of medical personnel gender and race representation in the health personnel pool and subsequent attempts to resolve these problems This volume pays special attention to current trends in healthcare and tries to forecast the direction of the debate over health personnel supply in the coming years Chronic care conditions and the ageing of the population on the one hand and the penetration of managed care and the subsequent transformation of American hospitals on the other converge to present policymakers with tremendous challenges in financing healthcare Ginzberg and Minogiannis argue that a more balanced production and distribution of U S health personnel will go far in easing the financial burden of healthcare and at the same time improve the quality of services provided to the American people Ginzberg and Minogiannis provide a historical perspective in U S Healthcare and the Future Supply of Physicians on the current controversies revealing the complex issues underlying them Indeed the authors point out that U S policymakers have often focused on the topic of the supply of physicians in addressing larger issues in health care Questions of how to ensure equitable access to care improve the quality of health care contain costs and best deliver services have shaped the assessments of how many physicians we should have Andrew Bindman and Margaret Wheeler The New England Journal of Medicine Eli Ginzberg was A Barton Hepburn Professor Emeritus at the Graduate School of Business and director of the Eisenhower Center for the Conservation of Human Resources at Columbia University An activist scholar rather than academic turned activist he is author of numerous books Panos Minogiannis is with the Mailman School of Public Health at Columbia University and a research associate at the Eisenhower Center Currently he is health services coordinator in Athens for the 2004 Olympics European Integration and Health Policy Panos Minogiannis, 2003-01-01 The impact of European integration on diverse national social policies is still largely unknown While policy decision making remains at the country level there is a strong possibility that indirectly as a result of ideological imperatives and financial constraints policies will change National health policy is a case in point This important volume explores the current and probable effect of European integration on health care protection Will it tend to encourage all European member states to provide equitable and universal access to quality care Or is the European integration process likely to lead to social exclusion of some The high degree of social welfare as a health expectancy holds great significance for decisions in countries like the United States facing similiar pressures for expanded coverage In answering these questions Panos Minogiannis examines policies in Greece France Germany and the Netherlands Minogiannis frames his argument through an exploration of the history of the institutionalization of health care Chapter 1 explores the nature of challenges that health care faces in an era of integration and the ways in which these challenges have emerged Chapter 2 discusses centralization of governance in Brussels describing the structure and relations of different European Union institutions and their interactions with member states The final portions of the book through case studies of the Dutch French German and Greek health reforms explore the history of the political development of health care institutions with a particular interest in

reform proposals in the last fifteen years Chapter 7 brings together lessons from previous chapters and discusses the dynamics of health policy making in the European Union Minogiannis concludes that health insurance will most likely remain at the member state level as far as politics are concerned at least for the present although policy makers will most likely have to deal with the issue of cross border health more comprehensively than in the past Those interested in comparative policy and in particular health care policy will find this volume highly informative reading Those interested in the impact of European integration will find it provocative Panos Minogiannis is with the Mailman School of Public Health at Columbia University and is a research associate at the Eisenhower Center Eli Ginzberg Irving Horowitz, 2017-12-04 The world of Eli Ginzberg can readily be thought of as a triptych a career in three parts In his early years Ginzberg s work was dedicated to understanding the history of economics from Adam Smith to C Wesley Mitchell and placing that understanding in what might well be considered economic ethnography His studies took him on travels from Wales in the United Kingdom to California in the United States For example the poignant account of Welsh miners in an era of economic depression and technological change remains a landmark work His report of a cross country trip taken in the first year of the New Deal provides insight and evaluation that can scarcely be captured in present day writings The second period of his career corresponds to Ginzberg's increasing involvement in the practice of economics He deals with issues related to manpower allocation employment shifts and gender and racial changes in the workforce His writing reflects a growing concern for child welfare and education In this period his work increasingly focuses on federal state and city governments and how the public sector impacts all basic social issues His work was sufficiently transcendent of political ideology that seven presidents sought and received his advice and participation After receiving all due encomiums and congratulations for intellectual work and policy research well done Ginzberg then went on to spend the next thirty years of his life carving out a place as a preeminent economist of health welfare services and hospital administration It is this portion of his life that is the subject of Eli Ginzberg The Economist as a Public Intellectual What is apparent in Ginzberg's work of this period is his sense of the growing interaction of all the social sciences pure and applied to develop a sense of the whole The contributors to this festschrift join together to provide a portrait of a figure whose life and work have spanned the twentieth century and yet pointed the way to changes in the twenty first century Eli Ginzberg from the start possessed a strong sense of social justice and economic equality grounded in a Judaic Christian tradition All of these aspects come together in the writings of a person who transcends all parochialism and gives substantive content to the often cloudy phrase public intellectual Irving Louis Horowitz is Hanna Arendt Distinguished Professor Emeritus at Rutgers the State University of New Jersey where he has taught for over thirty years He also serves as Chairman of the Board at Transaction Publishers His writings include Radicalism and the Revolt Against Reason Behemoth Main Currents in the History and Theory of Political Sociology and Taking Lives Genocide and State Power Consumer Choice Robert F. Rich, Christopher T. Erb, 2011-12-31 The United States health care system is

unique among those of other developed economies most significantly because health care is not a legal right in the United States Instead it is considered an employee benefit and a privilege unless one is over age 65 or of low income The United States is the only developed country without some form of universal health care Contributors to this volume represent an interdisciplinary group of academics practitioners and service delivery providers The volume begins with a general examination of the politics of health and social welfare in the United States It then focuses on the importance and role of consumers in the U S economy and dilemmas associated with promoting consumer choice It explores policy issues and challenges in three specific areas controlling health care costs and protecting choice with respect to health care the major challenges to informed choice in health care and barriers to effective health care service delivery Contributors explore changes and reforms that have been introduced within public and privately financed systems over the past ten years Consumer Choice examines in a timely and efficient manner critical social and health policy issues nationally and internationally and the major challenges that face informed choice in health care and social policy Policymakers health care officials and medical personnel in the United States and other countries will find this volume highly informative Anthropology and the World System Hans A.
