stranded negative sense RNA genome that is encapsidated by the nucleoprotein to form a helical nucleocapsid This  
ribonucleoproteic complex is the substrate for both transcription and replication The RNA dependent RNA polymerase binds  
to the nucleocapsid template via its co factor the phosphoprotein This book focuses on the main structural information  
available on the nucleoprotein showing that it consists of a structured core NCORE and of an intrinsically disordered C  
terminal domain NTAIL The functional implications of the disordered nature of NTAIL are discussed in light of the ability of  
disordered regions to establish interactions with multiple partners thus leading to multiple biological effects Indeed beyond  
the phosphoprotein NTAIL also interacts with cellular partners including the major heat shock protein hsp72 the interferon  
regulator factor 3 IRF3 and a yet unidentified cellular receptor referred to as NR This book consists of two chapters devoted  
to the general functions of the nucleoprotein in transcription and replication and to a detailed overview of its structural  
properties and of three chapters focused on the functional relevance of the interaction between NTAIL and its various
