The Of My Life De Vita Propria Liber 1929:

The Book of My Life Girolamo Cardano, 2002-10-31 A bright star of the Italian Renaissance Girolamo Cardano was an internationally sought after astrologer physician and natural philosopher a creator of modern algebra and the inventor of the universal joint Condemned by the Inquisition to house arrest in his old age Cardano wrote *The Book of My Life* an unvarnished and often outrageous account of his character and conduct Whether discussing his sex life or his diet the plots of academic rivals or meetings with supernatural beings or his deep sorrow when his beloved son was executed for murder Cardano displays the same unbounded curiosity that made him a scientific pioneer At once picaresque adventure and campus comedy curriculum vitae and last will *The Book of My Life* is an extraordinary Renaissance self portrait a book to set beside Montaigne's *Essays* and Benvenuto Cellini's *Autobiography* Italian Literature before 1900 in English Translation Robin Healey, 2011-12-15 *Italian Literature before 1900 in English Translation* provides the most complete record possible of texts from the early periods that have been translated into English and published between 1929 and 2008 It lists works from all genres and subjects and includes translations wherever they have appeared across the globe In this annotated bibliography Robin Healey covers over 5 200 distinct editions of pre 1900 Italian writings Most entries are accompanied by useful notes providing information on authors works translators and how the translations were received Among the works by over 1 500 authors represented in this volume are hundreds of editions by Italy's most translated authors Dante Alighieri Machiavelli and Boccaccio and other hundreds which represent the author's only English translation A significant number of entries describe works originally published in Latin Together with Healey's *Twentieth Century Italian Literature in English Translation* this volume makes comprehensive information on translations accessible for schools libraries and those interested in comparative literature *Asia in the Making of Europe, Volume II* Donald F. Lach, 2010-01-15 This is the second volume in a series that traces century by century the role of Asia in the making of Europe The rise to world dominance of the Western nations in modern times and the rapid industrial growth of the West which outpaced the East in technical and military achievements have led to a historical eclipse of the ancient and brilliant cultures of Asia Historian Donald F. Lach in his influential scholarly work *Asia in the Making of Europe* points out that an eclipse is never permanent that this one was never total and that there was a period in early modern times when Asia and Europe were close rivals in brilliance and mutual influence *The Physics of Wall Street* James Owen Weatherall, 2013-01-08 A look inside the world of quants and how science can and can't predict financial markets Entertaining and enlightening *The New York Times* After the economic meltdown of 2008 Warren Buffett famously warned beware of geeks bearing formulas But while many of the mathematicians and software engineers on Wall Street failed when their abstractions turned ugly in practice a special breed of physicists has a much deeper history of revolutionizing finance Taking us from fin de siècle Paris to Rat Pack era Las Vegas from wartime government labs to Yippie communes on the Pacific coast James Owen Weatherall shows how physicists

successfully brought their science to bear on some of the thorniest problems in economics from options pricing to bubbles. The crisis was partly a failure of mathematical modeling. But even more it was a failure of some very sophisticated financial institutions to think like physicists. Models, whether in science or finance, have limitations; they break down under certain conditions. And in 2008, sophisticated models fell into the hands of people who didn't understand their purpose and didn't care. It was a catastrophic misuse of science. The solution, however, is not to give up on models; it's to make them better. This book reveals the people and ideas on the cusp of a new era in finance from a geophysicist using a model designed for earthquakes to predict a massive stock market crash to a physicist-run hedge fund earning 2,478.6% over the course of the 1990s. Weatherall shows how an obscure idea from quantum theory might soon be used to create a far more accurate Consumer Price Index. The Physics of Wall Street will change how we think about our economic future. Fascinating history. Happily, the author has a gift for making complex concepts clear to lay readers. **Booklist**

John Dee's Conversations with Angels Deborah E. Harkness, 1999-11-13. John Dee's angel conversations have been an enigmatic facet of Elizabethan England's most famous natural philosopher's life and work. Professor Harkness contextualizes Dee's angel conversations within the natural philosophical, religious, and social contexts of his time, philosophy, and the apocalypse, and argues that they represent a continuing development of John Dee's earlier concerns and interests. These conversations include discussions of the natural world, the practice of natural philosophy, and the apocalypse.
