Böhme, U. Esser, W. Fricke, H. Hefe, I. Heinrich, W. Hofmann, D. Krahn, V. R. Matas, L. D. Schmadel, G. Zech, 2013-12-14 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of the literature concerning all aspects of astronomy astrophysics and their border fields It is devoted to the recording summarizing and indexing of the relevant publications throughout the world Astronomy and Astrophysics Abstracts is prepared by a special department of the Astronomisches Rechen Institut under the auspices of the International Astronomical Union Volume 40 records literature published in 1985 and received before February 15 1986 Some older documents which we received late and which are not surveyed in earlier volumes are included too We acknowledge with thanks contributions of our colleagues all over the world We also express our gratitude to all organizations observatories and publishers which provide us with complimentary copies of their publications Starting with Volume 33 all the recording correction and data processing work was done by means of computers The recording was done by our technical staff members Ms Helga Ballmann Ms Mona El Chourati Ms Monika Kohl Ms Sylvia Matyssek Ms Karirr Burkhardt Ms Susanne Schlötelberg Mr Martin Schlötelburg and Mr Stefan Wagner supported our task by careful proof reading It is a pleasure to thank them all for their encouragement      **Panic Attacks** Robert E. Bartholomew, Hilary Evans, 2004-08-19 Examining the ability of the media to whip up a panic and our tendency to fall victim to mass delusion and hysteria This title discusses America's kissing bug scare of 1899 Seattle's atomic fallout fiasco of 1954 the phantom slasher of Taipei in 1956 Belgium's recent Coca Cola poisoning scare and the mad gasser of Mattoon and more      **Halley's Comet** David Peck Todd, 1910      **Halley's Comet** Herbert Hall Turner, 1908      **Official Year-book of the Scientific and Learned Societies of Great Britain and Ireland**, 1911      **Halley's Comet** Scott Shaw, 1985      **Readers' Guide to Periodical Literature** Anna Lorraine Guthrie, 1915 An author subject index to selected general interest periodicals of reference value in libraries      *The Wayward Comet* Martin Beech, 2016-01-01 Comets have not only blazed across the celestial vault throughout human history they have embellished the night sky since the Earth itself formed some 4.5 billion years ago Comets were among the first born solid bodies in the solar system and their frozen nuclei tell of the primordial chemistry and chaos that ultimately resulted in the formation of the planets the evolution of life and us For all this however comets have long been celestial oddities they baffled our distant ancestors and human society continues to marvel and speculate wildly at their appearance even to the present day Cutting against the perceived constancy of the stars comets seemingly present themselves at random times and they are often interpreted as harbingers of terrestrial change both good and ill How then are we to tame the comet where do they form how

do they move and can their appearances be predicted Such questions have preoccupied astronomers for centuries but comets have only gradually allowed the secrets of their wayward flight to be revealed In this book I explore the historical struggle to understand not only the place of comets within a societal context but also the scientific quest to make their paths amenable to mathematical certitude The latter narrative is the more technical in content but it took tactile form with the invention in 1732 of the cometarium a mechanical device to demonstrate the first two of Kepler s planetary laws And this development was later paralleled in the mid to late 19th century by the development of various mechanical devices analog computers to help obtain solutions to Kepler s Problem the problem which asks exactly where in its orbit is a given comet at some specific set time The telling of the wayward comets story covers the past two millennia of human history and it takes us from the phenomenological musings of Aristotle through the exactitude of Newton s gravitational theory and calculus to the truly incredible study of comet 67P Churyumov Gerasimenko by the European Space Agency s Rosetta spacecraft in the modern era

M. Olson,Jay M. Pasachoff,1999-11-13 Comets and meteors are spectacular and awe inspiring natural phenomena which are among nature s most compelling icons Since the beginning of recorded time they have mesmerized people not least among them artists and astronomers Britain during the eighteenth and nineteenth centuries produced a larger number and greater variety of representations of comets and meteors than any other country The development of new technologies and the burgeoning interest of the general public in science and art dovetailed with the inherent British interest in nature and a strong literary tradition of comet and meteor symbolism This beautifully illustrated book examines the link between these works and the achievements of British science in the wake of Newton and Halley This book will be stimulating to anyone interested in the art or astronomy of comets      *Literature 1982, Part 2* Siegfried Böhme,Professor Dr. Walter Fricke,Herbert Hefele,Inge Heinrich,Wilfried Hofmann,Dietlinde Krahn,Vladimir R.
