Bulkley, Julie A. Marsh, Katharine O. Strunk, Douglas N. Harris, Ayesha K. Hashim, 2021-02-04 In Challenging the One Best System a team of leading education scholars offers a rich comparative analysis of the set of urban education governance reforms collectively known as the portfolio management model They investigate the degree to which this model a system of schools operating under different types of governance and with different degrees of autonomy challenges the standard structure of district governance famously characterized by David Tyack as the one best system The authors examine the design and enactment of the portfolio management model in three major cities New Orleans Los Angeles and Denver They identify the five interlocking mechanisms at the core of the model planning and oversight choice autonomy human capital and school supports and show how these are implemented differently in each city Using rich qualitative data from extensive interviews the authors trace the internal tensions and tradeoffs that characterize these systems and highlight the influence of historical and contextual factors as well Most importantly they question whether the portfolio management

model represents a fundamental restructuring of education governance or more incremental change and whether it points in the direction of meaningful improvement in school practices Drawing on a rigorous multimethod study Challenging the One Best System represents a significant contribution to our understanding of system level change in education Urban Education in the 19th Century D.A. in Florida sociologists and historians evaluate Governor Jeb Bush's nation leading school reform policies since 1999. They examine the startlingly broad range of education policy changes enacted in Florida during Bush's first term including moves toward privatization with a voucher system, more government control of public education institutions with centralized accountability mechanisms and a superboard for all public education. The contributors arrive at a mixed conclusion regarding Bush's first term education policies while he deserves credit for holding students to higher standards, his policies have unfortunately pushed for equality in a very narrow way. The contributors remain skeptical about seeing significant and sweeping improvement in how well Florida schools work for all students.

The Urban School System of the Future Andy Smarick, 2012-10-12. For more than two generations the traditional urban school system the district has utterly failed to do its job prepare its students for a lifetime of success. Millions and millions of boys and girls have suffered the grievous consequences. The district is irreparably broken. For the sake of today's and tomorrow's inner city kids it must be replaced. The Urban School System of the Future argues that vastly better results can be realized through the creation of a new type of organization that properly manages a city's portfolio of schools using the revolutionary principles of chartering. It will ensure that new schools are regularly created that great schools are expanded and replicated that persistently failing schools are closed and that families have access to an array of high quality options. This new entity will focus exclusively on school performance meaning among other things our cities can thoughtfully integrate their traditional public charter public and private schools into a single high functioning K-12 system. For decades the district has produced the most heartbreaking results for already at risk kids. The Urban School System of the Future explains how we can finally turn the tide and create dynamic responsive high performing self improving urban school systems that fulfill the promise of public education.

Creating the Suburban School Advantage John L. Rury, 2020-04-15. Creating the Suburban School Advantage explains how American suburban school districts gained a competitive edge over their urban counterparts. John L. Rury provides a national overview of the process focusing on the period between 1950 and 1980 and presents a detailed study of metropolitan Kansas City a region representative of trends elsewhere. While big city districts once were widely seen as superior and attracted families seeking the best educational opportunities for their children suburban school systems grew rapidly in the post World War II era as middle class and more affluent families moved

to those communities As Rury relates at the same time economically dislocated African Americans migrated from the South to center city neighborhoods testing the capacity of urban institutions As demographic trends drove this urban suburban divide a suburban ethos of localism contributed to the socioeconomic exclusion that became a hallmark of outlying school systems School districts located wholly or partly within the municipal boundaries of Kansas City Missouri make for revealing cases that illuminate our understanding of these national patterns As Rury demonstrates struggles to achieve greater educational equity and desegregation in urban centers contributed to so called white flight and what Senator Daniel Patrick Moynihan considered to be a crisis of urban education in 1965 Despite the often valiant efforts made to serve inner city children and bolster urban school districts this exodus Rury cogently argues created a new metropolitan educational hierarchy a mirror image of the urban centric model that had prevailed before World War II The stubborn perception that suburban schools are superior based on test scores and budgets has persisted into the twenty first century and instantiates today s metropolitan landscape of social economic and educational inequality

Educating Harlem Ansley T. Erickson, Ernest Morrell, 2019-11-12 Over the course of the twentieth century education was a key site for envisioning opportunities for African Americans but the very schools they attended sometimes acted as obstacles to black flourishing Educating Harlem brings together a multidisciplinary group of scholars to provide a broad consideration of the

history of schooling in perhaps the nation's most iconic black community. The volume traces the varied ways that Harlem residents defined and pursued educational justice for their children and community despite consistent neglect and structural oppression. Contributors investigate the individuals, organizations, and initiatives that fostered educational visions, underscoring their breadth, variety, and persistence. Their essays span the century from the Great Migration and the Harlem Renaissance through the 1970s fiscal crisis and up to the present. They tell the stories of Harlem residents from a wide variety of social positions and life experiences, from young children to expert researchers to neighborhood mothers and ambitious institution builders who imagined a dynamic array of possibilities from modest improvements to radical reshaping of their schools. Representing many disciplinary perspectives, the chapters examine a range of topics including architecture, literature, film, youth, and adult organizing, employment, and city politics. Challenging the conventional rise and fall narratives found in many urban histories, the book tells a story of persistent struggle in each phase of the twentieth century. *Educating Harlem* paints a nuanced portrait of education in a storied community and brings much needed historical context to one of the most embattled educational spaces today.
