## **The Opening Of The Temple Doors:**

*Mirror Opens Ancient Temple Door.* William Van Zyl, 2023-12-29 I have produced a fictitious short story about how Lara and Alexander the two archaeologists found the elusive El Dorado temple and unearthed the Golden Mask In this resource including the exciting legend of the elusive city of El Dorado I look at the story the gold the treasure the golden mask and a modern day escape room I provide prompts for using technology in the context of creating an El Dorado themed escape room Inspired by my visit to an escape room in Hamilton NZ in December 2023 I show how technology like digital sensors surveillance cameras and more could be used in escape rooms I use a simple microprocessor like the Arduino Uno to show how this microprocessor could detect light and switch a rack and pinion powered by an electric motor to open a door Just like Lara and Alexander opened the door by reflecting the shaft of daylight from the cave roof onto the mirrors and the Sun motif I use the Arduino an LDR light dependent resistor a relay and an electric motor to show how a door in an escape room can be opened This resource could be helpful to teachers and students The focus is integrating different subject areas for a lesson for high school students For example the brief is to design an El Dorado themed escape room I focus on technical aspects like art design and electronics digital sensors surveillance cameras servos racks and pinions and more to detect switch and move doors The focus is also on how to create a light sensor LDR light dependent resistor to detect when a mirror reflects light that suddenly comes from a crack in the cave an electrical light switched on after a symbolic puzzle is solved Improving and developing collaboration and solving real life problems is another aspect I investigate I look at the design of a board game context Escape room Developing creative and innovative skills of students and teachers I also touch on renewable systems Installing solar panels wind turbines inverters and 12 Volt DC batteries on a micro scale to power an escape room or a model of an escape room Lastly I provide links to cave ecosystems I include the Waitomo Caves in New Zealand famous glowworms See the ideas and concepts for possible lessons for students in this article It is challenging to layer embed and integrate different subject areas into one or a set of lessons

Sacred Thresholds: The Door to the Sanctuary in Late Antiquity Emilie M. van Opstall, 2018-07-10 Sacred Thresholds The Door to the Sanctuary in Late Antiquity offers a far reaching account of boundaries within pagan and Christian sanctuaries gateways in a precinct outer doors of a temple or church inner doors of a cella The study of these liminal spaces within Late Antiquity itself a key period of transition during the spread of Christianity when cultural paradigms were redefined demands an approach that is both interdisciplinary and diachronic Emilie van Opstall brings together both upcoming and noted scholars of Greek and Latin literature and epigraphy archaeology art history philosophy and religion to discuss the experience of those who crossed from the worldly to the divine both physically and symbolically What did this passage from the profane to the sacred mean to them on a sensory emotive and intellectual level Who was excluded and who was admitted The articles each offer a unique perspective on pagan and Christian sanctuary doors in the Late Antique Mediterranean
