**Counseling for Self- and Career Construction** Jacobus Gideon (Kobus) Maree, 2020-06-29 This book sets out to provide context for innovating counseling for self and career construction. It gives readers insight into the theory underlying an innovative integrative qualitative quantitative approach to career counseling. Three key ideas recur throughout the book. First, the idea of not dispensing advice to people, instead enabling them to advise themselves. Second, the idea of listening for, instead of to, people's stories to help them choose and construct careers and themselves and shape their career identities. Third, the idea of helping people connect what they know about themselves consciously with what they are aware of subconsciously. The book confronts some of the main challenges posed by Work 4.0 on the workplace but also foreshadows the imminent advent of Work 5.0. It endeavors to promote career counselors' ability to help people thrive at a time when many speculate that work itself is at risk; occupational contexts no longer hold workers in the way they used to, and the coronavirus pandemic is disrupting the workplace. *Annual Report of the State Employment Commissioner of Maryland*, Maryland. [Summary of John Maynard Keynes's The General Theory of Employment, Interest and Money](#) Everest Media, 2022-03-04T22:59:00Z Please note: This is a companion version, not the original book. Sample Book Insights 1. I have called this book *The General Theory of Employment, Interest and Money*, placing the emphasis on the prefix *general*. The object of such a title is to contrast the character of my arguments and conclusions with those of the classical theory of the subject upon which I was brought up and which dominates the economic thought of the governing and academic classes of this generation.
