Monet Debussy and Brecht for instance is explored to suggest a subtle and complex circulation of idea between the Orient and the West Other essays investigate the scholar s own encounter with the exotic in particular they ask to what extent Western concepts and categories can be used in the analysis of Asian societies and cultures Among the concepts considered are space in Chinese art landscape high art low art and opera in Indonesia and tragedy the book concert music and subjectivity in Japan Furthermore the implications of orality and literacy are examined in the case of Malay society Like discredited orientalists the authors of this volume are in most cases based in the West in universities in Europe United States and Australia but their investigations are not grounded in confident assumptions about Western power and civilisation Recovering the Orient probes the Asian other at a time of conceptual uncertainty when foundational tenets of Western civilisation have come under question
