The Other Mirror:

The Other Mirror Miguel Angel Centeno, Fernando López-Alves, 2020-12-08 If social science's cultural turn has taught us anything it is that knowledge is constrained by the time and place in which it is produced In response scholars have begun to reassess social theory from the standpoints of groups and places outside of the European context upon which most grand theory is based Here a distinguished group of scholars reevaluates widely accepted theories of state property race and economics against Latin American experiences with a two fold purpose They seek to deepen our understanding of Latin America and the problems it faces And by testing social science paradigms against a broader variety of cases they pursue a better and truly generalizable map of the social world Bringing universal theory into dialogue with specific history the contributors consider what forms Latin American variations of classical themes might take and which theories are most useful in describing Latin America For example the Argentinian experience reveals the limitations of neoclassical descriptions of economic development but Charles Tilly's emphasis on the importance of war and collective action to statemaking holds up well when thoughtfully adapted to Latin American situations Marxist structural analysis is problematic in a region where political divisions do not fully express class cleavages but aspects of Karl Polanyi's socioeconomic theory cross borders with relative ease This fresh theoretical discussion expands the scope of Latin American studies and social theory bringing the two into an unprecedented conversation that will benefit both Contributors are in addition to the editors Jeremy Adelman Jorge I Domínguez Paul Gootenberg Alan Knight Robert M Levine Claudio Lomnitz John Markoff Verónica Montecinos Steven C Topik and J Samuel Valenzuela

Animal Minds & Animal Ethics Klaus Petrus, Markus Wild, 2014-03-15 Animal minds and animal ethics different origins connecting similarities Philosophers working on questions of animal ethics usually draw on research into animal cognition and subscribe to strong positions regarding animal minds Whereas philosophers interested in the question of animal minds sometimes draw ethical conclusions from the positions they argue for In spite of such overlaps these two areas of research have grown up separately One reason for this separation stems from the institutional distinction between theoretical and practical philosophy The principal aim of this anthology is to build bridges between the fields and different philosophical approaches of animal ethics and of animal minds and cognition

Downcast Eyes Martin Jay, 1993 Long considered the noblest of the senses vision has increasingly come under critical scrutiny by a wide range of thinkers who question its

dominance in Western culture These critics of vision especially prominent in twentieth century France have challenged its allegedly superior capacity to provide access to the world They have also criticized its supposed complicity with political and social oppression through the promulgation of spectacle and surveillance Martin Jay turns to this discourse surrounding vision and explores its often contradictory implications in the work of such influential figures as Jean Paul Sartre Maurice Merleau Ponty Michel Foucault Jacques Lacan Louis Althusser Guy Debord Luce Irigaray Emmanuel Levinas and Jacques Derrida Jay begins with a discussion of the theory of vision from Plato to Descartes then considers its role in the French Enlightenment before turning to its status in the culture of modernity From consideration of French Impressionism to analysis of Georges Bataille and the Surrealists Roland Barthes s writings on photography and the film theory of Christian Metz Jay provides lucid and fair minded accounts of thinkers and ideas widely known for their difficulty His book examines the myriad links between the interrogation of vision and the pervasive antihumanist antimodernist and counter enlightenment tenor of much recent French thought Refusing however to defend the dominant visual order he calls instead for a plurality of scopic regimes Certain to generate controversy and discussion throughout the humanities and social sciences *Downcast Eyes* will consolidate Jay s reputation as one of today s premier cultural and intellectual historians

Extimacy Nadia Bou Ali,Surti Singh,2024-10-15 Bringing together theorists and practitioners of psychoanalysis to interrogate Lacan s notion of extimit In 1960 Jacques Lacan coined the neologism extimit extimacy to denote a structure of subjectivity in which the most intimate internal core is already external thus complicating the traditional philosophical dualisms and binaries that have informed traditional notions of subjectivity This collection is the first sustained interrogation of the concept of extimacy comprising contributions on various topics by
