**Power without Knowledge** Jeffrey Friedman,2019-12-16

Technocrats claim to know how to solve the social and economic problems of complex modern societies But as Jeffrey Friedman argues in *Power without Knowledge* there is a fundamental flaw with technocracy it requires an ability to predict how the people whom technocrats attempt to control will act in response to technocratic policies However the mass public s

ideas the ideas that drive their actions are far too varied and diverse to be reliably predicted But that is not the only problem Friedman reminds us that a large part of contemporary mass politics even populist mass politics is essentially technocratic too Members of the general public often assume that they are competent to decide which policies or politicians will be able to solve social and economic problems Yet these ordinary citizen technocrats typically regard the solutions to social problems as self evident such that politics becomes a matter of vetting public officials for their good intentions and strong wills not their technocratic expertise Finally Friedman argues that technocratic experts themselves drastically oversimplify technocratic realities Economists for example theorize that people respond rationally to the incentives they face This theory is simplistic but it gives the appearance of being able to predict people s behavior in response to technocratic policy initiatives If stripped of such gross oversimplifications though technocrats themselves would be forced to admit that a rational technocracy is nothing more than an impossible dream Ranging widely over the philosophy of social science rational choice theory and empirical political science *Power without Knowledge* is a pathbreaking work that upends traditional assumptions about technocracy and politics forcing us to rethink our assumptions about the legitimacy of modern governance
