Igamberdiev,2020-11-30 Philosophy in Reality offers a new vision of the relation between science and philosophy in the
framework of a non propositional logic of real processes grounded in the physics of the real world This logical system is
based on the work of the Franco Romanian thinker St phane Lupasco 1900 1988 previously presented by Joseph Brenner in
the book Logic in Reality Springer 2008 The present book was inspired in part by the ancient Chinese Book of Changes I
Ching and its scientific philosophical discussion of change The emphasis in Philosophy in Reality is on the recovery of
dialectics and semantics from reductionist applications and their incorporation into a new synthetic paradigm for knowledge
Through an original re interpretation of both classical and modern Western thought this book addresses philosophical issues
in scientific fields as well as long standing conceptual problems such as the origin nature and role of meaning the unity of
knowledge and the origin of morality In a rigorous transdisciplinary manner it discusses foundational and current issues in
the physical sciences mathematics information communication and systems theory and their implications for philosophy The
same framework is applied to problems of the origins of society the transformation of reality by human subjects and the
emergence of a global sustainable information society In summary Philosophy in Reality provides a wealth of new
perspectives and references supporting research by both philosophers and physical and social scientists concerned with the
many facets of reality Publishers' Circular and Booksellers' Record of British and Foreign Literature ,1895 Program
