Social Health Insurance Reexamined Adam Wagstaff,2007 Abstract Social health insurance SHI is enjoying something of a revival in parts of the developing world Many countries that have in the past relied largely on tax finance and out of pocket payments have introduced SHI or are thinking about doing so And countries with SHI already in place are making vigorous efforts to extend coverage to the informal sector Ironically this revival is occurring at a time when the traditional SHI countries in Europe have either already reduced payroll financing in favor of general revenues or are in the process of doing so This paper examines how SHI fares in health care delivery revenue collection covering the formal sector and its impacts on the labor market It argues that SHI does not necessarily deliver good quality care at a low cost partly because of poor regulation of SHI purchasers It suggests that the costs of collecting revenues can be substantial even in the formal sector where nonenrollment and evasion are commonplace and that while SHI can cover the formal sector and the poor relatively easily it fares badly in terms of covering the nonpoor informal sector workers until the economy has reached a high level of economic development The paper also argues that SHI can have negative labor market effects

Moving toward Universal Coverage of Social Health Insurance in Vietnam Aparnaa Somanathan,Ajay Tandon,Huong Lan Dao,Kari L. Hurt,Hernan L. Fuenzalida-Puelma,2014-06-26 Over the past two decades Vietnam has made enormous progress towards achieving universal coverage UC for its population Significant challenges remain however in terms of improving equity with continuing low rates of enrollment Ensuring financial protection also remains an elusive goal The Master Plan for Universal Coverage approved in 2012 by the Prime Minister directly addresses both these deficiencies in coverage The objective of this report is to assess the implementation of Vietnam SHI and provide options for moving towards UC This is a joint assessment with development partners World Health Organization United Nations Children s Fund Unicef and Rockefeller Foundation Expanding breadth of coverage particularly for those hard to reach groups such as the near poor and informal sector would require substantially increasing general revenue subsidies and fully subsidizing the premiums for the near poor High enrollment rates would however have little impact on financial protection and equity if OOP costs remain high Achieving UC will require sustained efforts to improve efficiency in the system and gain better value for money from

available budgetary resources without these efforts any further progress towards UC would be financially unsustainable There is considerable scope for improving efficiency in Vietnam Fragmentation in the pooling of funds gives rise to unnecessary costs Inefficiencies in resource allocation and purchasing arrangements include i an overly generous benefits package ii provider payment mechanisms and the mix of incentives facing providers which result in an oversupply of services iii high prices overconsumption and inappropriate use of pharmaceuticals and iv the structure and incentives embedded within the delivery system The organization management and governance of SHI are fragmented and often dysfunctional The present institutional setting for SHI needs to be assessed and changed
