William Brustein,Louisa Roberts,2015-07-23 This study examines fully the role that the historic European left has played in developing and espousing anti Semitic views Folk Engineering Stephen J. Ramos,2025-11-04 During the interwar years the discourse of regional planning profoundly reformulated the spatiality of race and place in the United States In the South Jim Crow brutality and agricultural crisis fueled unprecedented population outmigration Sociologist and author Howard W Odum founded the Institute for Research in Social Science at the University of North Carolina to develop a Southern regionalism that reasserted organic territorial culture amid that flux Regionalism connected the arts humanities and social sciences across the country in a collective effort to elevate place based narrative and folk sensibility to an all encompassing social theory Stephen J Ramos refocuses the history of US regionalism and regional planning on the South illuminating the modern tensions inherent in regionalism as nostalgic cultural practice paired with future oriented planning ideology By tracing Southern regionalists intellectual history and institutional biography Ramos explores how they developed a regional nationalism through surveying and planning that came to inspire federal New Deal policies for the South In showing how Odum's influence crossed various borders Ramos offers us a nuanced way to reappraise race social science and planning in

the US South **The Sources of Social Power: Volume 2, The Rise of Classes and Nation-States, 1760-1914** Michael Mann, 2012-09-24 This second volume deals with power relations between the Industrial Revolution and the First World War

Roots of Hate William Brustein, 2003-10-13 William I Brustein offers the first truly systematic comparative and empirical examination of anti-Semitism within Europe before the Holocaust Brustein proposes that European anti-Semitism flowed from religious racial economic and political roots which became enflamed by economic distress rising Jewish immigration and socialist success To support his arguments Brustein draws upon a careful and extensive examination of the annual volumes of the American Jewish Year Books and more than 40 years of newspaper reportage from Europe's major dailies The findings of this informative book offer a fresh perspective on the roots of society's longest hatred **Citizenship and Wars**

Dr Bertrand Taithe, Bertrand Taithe, 2003-09-02 The early years of democracy in France were marked by a society divided by civil war class war and violent conflict *Citizenship and Wars* explores the concept of citizenship in a time of social and political upheaval and considers what the conflict meant for citizen soldiers women children and the elderly This highly original argument based on primary research brings new life to debates about the making of French identity in the 19th century Putting the latest theoretical thinking into empirical use the author assesses how the function of the state and its citizens changed during the Paris Commune and Franco-Prussian War The study considers fresh issues such as how the people coped with the collapse of their government what the upheaval meant for the provinces of France how the issue of citizenship affected religious identities the differences between colonial Algeria and metropolitan France *Regions J.*

Nicholas Entrikin, 2017-05-15 This volume gathers a collection of the most seminal essays written by leading experts in the field which identify or signal many of the changing directions of regional research in geography during the past fifty years Various forms of new regionalism or new regional geography have emerged over the last several decades especially in political and economic geography but in general the region has been a concept in declining use Despite this the region has gained new currency in sub areas of political and economic geography and a so called new regionalism has emerged in studies of the changing nature of the nation state in a globalizing economy Taken together the essays in this volume provide the reader with a comprehensive overview of academic developments in this area of geographical research Reanimating

Regions James Riding, Martin Jones, 2017-05-12 Writing regions undertaking a regional study was once a standard form of geographic communication and critique This was until the quantitative revolution in the middle of the previous century and more definitively the critical turn in human geography towards the end of the twentieth century From then on writing regions as they were experienced phenomenologically or arguing culturally historically and politically with regions was deemed to be old fashioned Yet the region is and always will be a central geographical concept and thinking about regions can tell us a lot about the history of the discipline called geography Despite taking up an identifiable place within the geographical imagination in scholarship and beyond region remains a relatively forgotten under used and in part under theorised term

Reanimating Regions marks the continued reinvigoration of a set of disciplinary debates surrounding regions the regional and regional geography Across 18 chapters from international interdisciplinary scholars this book writes and performs region as a temporary permanence something held stable not fixed and absolute at different points in time for different purposes There is as this expansive volume outlines no single reading of a region Reanimating Regions collectively rebalances the region within geography and geographical thought In renewing the geography of regions as not only a site of investigation but also as an analytical framework through which to write the world what emerges is a powerful reworking of the geographic imagination Read against one another the chapters weave together timely commentaries on region and regions across the globe with a particular emphasis upon the regional as played out in the United Kingdom and regional worlds both within and beyond Europe offering chapters from Africa and South America Addressing both the political and the cultural this volume responds to the need for a consolidated and considered reflection on region the regional and regional geography speaking directly to broader intellectual concerns with performance aesthetics identity mobilities the environment and the body
