Epstein, 1969 Social Networks John Scott, 2002 This collection brings together the principal sources in the development of the techniques of social network analysis from early metaphorical statements in Simmel and Radcliffe Brown through the more systematic explorations in sociology and social anthropology to contemporary formalizations A new introduction explores the history of Social Networks and highlights the arguments of those who treat social network analysis as a loose qualitative approach as well as those who see its potential in technical mathematical uses The thematically organized coverage includes Part I Conceptualizing Social Networks Part II Topics and Developments in Graph Theory Part III Further Mathematical Models for Networks Part IV Applications Family and Community Part V Applications Corporate Power and Economic Structures Part VI Applications Political Protest and Policy Networks Part VII Applications Knowledge Reputation and Diffusion **Associational Life in African Cities** Arne Tostensen, Inge Tvedten, Mariken Vaa, 2001 The book contains 17 chapters with material from 13 African countries from Egypt to Swaziland and from Senegal to Kenya Most of the authors are young African academics The focus of the volume is the multitude of voluntary associations that has emerged in African cities in recent years In many cases they are a response to mounting poverty failing infrastructure and services and more generally weak or abdicating urban governments Some associations are new in other cases existing organizations are taking on new tasks Associations may be neighbourhood based others may be city wide and based on professional groupings or a shared ideology or religion Still others have an ethnic base Some of these organizations are engaged in both day to day matters of urban management and more long term urban development Urban associations challenge the monopoly of local and central government institutions **Social Networks** Samuel Leinhardt, 2013-09-17 **Social Networks A Developing Paradigm** contains studies of the nature and impact of social structure on behavior It draws together readings from a variety of social science areas that share the basic premise that structure in social relationships can be fruitfully operationalized in terms of networks It attempts to bring together classic works that opened new research areas and works that contain important statements of perspective method or empirical findings The book is organized into four parts Part I focuses on the cognitive organization of social relations and the effects of local social structure on individuals In Part II the authors consider networks of ties in large social agglomerations and treat a variety of different types of social relationships The emphasis here is on empirical studies Specific extant social networks are

investigated to test a variety of structural hypotheses Part III contains studies that address issues more common among social anthropologists than sociologists or social psychologists The chapters in Part IV while occasionally containing applications are primarily methodological These discuss mathematical and statistical ideas for modeling and analyzing social networks
