Future Survey Annual 1983 Michael Marien,1984-01-01 *Recommendations and Reports* Administrative Conference of the United States,1994 Federal Agency Use of Audited Self-regulation as a Regulatory Technique Douglas C.

Michael,1993 **Reforming the Workplace** Joseph Rees,2016-11-11 Government regulatory agencies are too often tangled webs of bureaucracy fraught with internal politics and in conflict with both industries and individuals How to instigate and implement the needed reform is a timely issue that is currently being debated Reforming the Workplace is an account of a successful program that is now a model for nationwide improvements in various regulatory agencies Joseph Rees s focus is the Occupational Safety and Health Administration OSHA which in 1982 announced a major shift in policy from strict government regulation to self regulation by industries with proven safety records In California this resulted in the Cooperative Compliance Program CCP an arrangement among labor unions management and California OSHA that became responsible for overseeing safety regulations at seven large construction sites throughout the state In his detailed study of the CCP Joseph Rees provides important empirical data and assesses the reasons the program succeeded That success is so important he demonstrates because the CCP represents a different approach to reform self regulation that can be extended to and tailored for many troubled agencies Reforming the Workplace is a comprehensive study that will be a valuable resource for scholars and students of law and social policy in general and of federal regulation policies in particular

Going by the Book Walter Kaufmann,2017-07-05 The extent to which government should be involved with regulation in the private sector is much debated More fundamentally one might ask exactly what is regulation why is it needed how is it formulated and how is it enforced These questions are especially relevant at a time in United States history when federal involvement in spheres traditionally left to individuals is being widely debated on all sides of the political spectrum

Housing and Planning References ,1983 **Pluralism by the Rules** Edward P. Weber,1998-01-01 Despite America s pluralistic fragmented and generally adversarial political culture participants in pollution control politics have begun to collaborate to reduce the high costs of developing implementing and enforcing regulations Edward P Weber uses examples from this traditionally combative policy arena to propose a new model for regulation pluralism by the rules a structured collaborative format that can achieve more effective results at lower costs than typically come from antagonistic approaches Weber cites the complexity and high implementation costs of environmental policy as strong but insufficient incentives for collaboration He shows that cooperation becomes possible when opposing sides agree to follow specific rules that include formal binding agreements about enforcement commitment to the process by political and bureaucratic leaders and the ensured access and accountability of all parties involved Such rules establish trust create assurances that agreements will be enforced and reduce the perceived risks of collaboration Through case studies dealing with acid rain reformulated gasoline and oil refinery pollution control Weber demonstrates the potential of collaboration for realizing a cleaner environment lower

compliance costs and more effective enforcement Challenging the prevailing view that endless conflict in policymaking is inevitable Pluralism by the Rules establishes a theoretical framework for restructuring the regulatory process **Social Regulation** Eugene Bardach,1982-01-01 *The Regulatory Craft* Malcolm K. Sparrow,2011-01-01 The Regulatory Craft tackles one of the most pressing public policy issues of our time the reform of regulatory and enforcement practice Malcolm K Sparrow shows how the vogue prescriptions for reform centered on concepts of customer service and process improvement fail to take account of the distinctive character of regulatory responsibilities which involve the delivery of obligations rather than just services In order to construct more balanced prescriptions for reform Sparrow invites us to reconsider the central purpose of social regulation the abatement or control of risks to society He recounts the experiences of pioneering agencies that have confronted the risk control challenge directly developing operational capacities for specifying risk concentrations problem areas or patterns of noncompliance and then designing interventions tailored to each problem At the heart of a new regulatory craftsmanship according to Sparrow lies the central notion pick important problems and fix them This beguilingly simple idea turns out to present enormously complex implementation challenges and carries with it profound consequences for the way regulators organize their work manage their discretion and report their performance Although the book is primarily aimed at regulatory and law enforcement practitioners it will also be invaluable for legislators overseers and others who care about the nature and quality of regulatory practice and who want to know what kind of performance to demand from regulators and how it might be delivered It stresses the enormous benefit to society that might accrue from development of the risk control art as a core professional skill for regulators Going by the Book , The extent to which government should be involved with regulation in the private sector is much debated More fundamentally one might ask exactly what is regulation why is it needed how is it formulated and how is it enforced These questions are especially relevant at a time in United States history when federal involvement in spheres traditionally left to individuals is being widely debated on all sides of the political spectrum
