Social Science and National Security Policy Janeen M. Klinger, 2019-02-07 This book examines how deterrence coercion and modernization theory has informed U S policy addressing why former Defense Secretary Robert McNamara s famous description of the Vietnam War as the social scientist s war is so accurate By tracing the evolution of ties between social scientists and the government beginning in World War I and continuing through the Second World War and the early Cold War the narrative highlights the role of institutions like the RAND Corporation the Social Science Research Council and MIT s Center for International Studies that facilitate these ties while providing a home for the development of theory The author compares and contrasts the ideas of Bernard Brodie Herman Kahn Albert Wohlstetter Thomas Schelling Gabriel Almond Lucian Pye and Walt Rostow among others and offers a cautionary tale concerning the difficulties and problems encountered when applying social science theory to national security policy

Laws And Explanation In The Social Sciences Lee C McIntyre, 2018-10-08 The first full length defense of social scientific laws to appear in the last twenty years this book upholds the prospect of the nomological explanation of human behavior against those who maintain that this approach is impossible impractical or irrelevant By pursuing an analogy with the natural sciences McIntyre shows that the barriers to nomological inquiry within the social sciences are not generated by factors unique to social inquiry but arise from a largely common set of problems that face any scientific endeavor All of the most widely supported arguments against social scientific laws have failed largely due to adherence to a highly idealized conception of nomologicality allegedly drawn from the natural sciences themselves and the limited doctrine of descriptivism Basing his arguments upon a more realistic view of scientific theorizing that emphasizes the

pivotal role of redescription in aiding the search for scientific laws McIntyre is optimistic about attaining useful law like explanations of human behavior
