Social Security A Reciprocity System Under Pressure:

Social Security Edward Wynne,1980 **Social Security** Edward A. Wynne,1980 **Reciprocity (Routledge Revivals)** Lawrence C. Becker,2014-06-17 The tendency to reciprocate to return good for good and evil for evil is a potent force in human life and the concept of reciprocity is closely connected to fundamental notions of justice obligation or duty gratitude and equality In *Reciprocity* first published in 1986 Lawrence Becker presents a sustained argument about reciprocity beginning with the strategy for developing a moral theory of the virtues He considers the concept of reciprocity in detail contending that it is a basic virtue that provides the basis for parental authority obligations to future generations and obedience to law Throughout the first two parts of the book Becker intersperses short pieces of his own narrative fiction to enrich reflection on the philosophical arguments The final part is devoted to extensive bibliographical essays ranging over anthropology psychology political theory and law as well as the relevant ethics and political philosophy Personnel Literature United States. Office of Personnel Management. Library,1981 An Inquiry Into Well-being and Destitution Partha Dasgupta,1995 An interdisciplinary book by one of the most respected scholars in what is broadly development economics but encompasses the most recent insights from philosophical research and empirical work on resource allocation nutrition science and anthropology It has been widely recognized as a seminal work presenting a wide ranging description of the causes and remedies of poverty and undernourishment and addressing the current debate over methods of estimating their incidence **Beyond Entitlement** Lawrence M. Mead,2008-06-30 Mead s timely and closely reasoned analysis makes a strong intellectual and moral case for a more authoritative welfare policy **Family Systems and Inheritance Patterns** Judith N. Cates,Marvin B. Sussman,1982 Specialists in economics law psychology and sociology provide a comprehensive examination of the disposition of property following a death *Gaining The Dividends Of Longer Life* Jarold A. Kieffer,2019-04-08 Not all older people are unfit for work Indeed most people over age 55 remain physically and mentally able to work and rather than suffer the pressures of inflation or the boredom of idleness many would prefer to stay productive longer Dr Kieffer says that their extensive experience and education qualify most of them to remain self reliant well past current retirement ages If they are enabled to do so it would delay and reduce the time when they are forced to be financially and in some cases physically dependent He argues that unless policy leaders in both the public and private sectors act quickly and imaginatively to gain the financial and social dividends that can accrue from longer life our country by default will find itself preoccupied over the next thirty years with unnecessarily high costs of supporting its longer living and rapidly increasing older population Dr Kieffer explains why current retirement policies are no longer economically and politically manageable and he suggests a cost effective strategy whereby public and private funds could be used to enable millions of older people to remain active in jobs that serve unmet community needs He also outlines a strategy for helping young workers build retirement income assets during their entire work lives so that the unintended burdens that have fallen on the

Social Security pension and public assistance programs can be eased and made more manageable in the future. Lastly, he describes the roles that government agencies, businesses, educational institutions, foundations, and older people themselves can play in carrying out the jobs and retirement income strategies. *Social Security* Edward Wynne, 1980-10-16

The Municipal Money Chase Alberta Sbragia, 2019-07-09

Gone are the days when the raising and apportioning of municipal monies was a relatively simple task when ample income could be expected to meet projected needs and also fund a few additional projects. Now local officials are faced with shrinking budgets, tax revolts, decreasing federal support, increasing state and federal regulations, in short, genuine crunches that leave them pondering how sparse resources can ever be stretched to meet the multitude of actual needs. This book stresses the political dimensions of local finance, emphasizing the local intergovernmental and private sector constraints faced by municipal officials in their attempt to provide services while balancing the budget. Integrating the implications of the Reagan administration's new approach to federal spending into their analyses, the authors examine the impact of state regulations on local taxation and debt policies, the relationship between local governments and the municipal bond market, the political economy of New York City's fiscal crisis, and the impact of various tax limitation measures, including California's Proposition 13. They also study the effect of community development grants on local decisionmaking structures and the impact of urban congressional representatives on the allocation of federal grants. Their presentation is aimed especially at graduate and upper level undergraduate students of urban politics, local finance, state and local government, and intergovernmental relations.
