Woodhead, 2010-06-24 This timely book aims to change the way we think about religion by putting emotion back onto the agenda It challenges a tendency to over emphasise rational aspects of religion and rehabilitates its embodied visceral and affective dimensions Against the view that religious emotion is a purely private matter it offers a new framework which shows how religious emotions arise in the varied interactions between human agents and religious communities human agents and objects of devotion and communities and sacred symbols It presents parallels and contrasts between religious emotions in European and American history in other cultures and in contemporary western societies By taking emotions seriously A Sociology of Religious Emotion sheds new light on the power of religion to shape fundamental human orientations and motivations hopes and fears joys and sorrows loves and hatreds

Sociologism and Existentialism Edward A. Tiryakian, 1979 Existentialism and Sociology Gila Hayim, 2017-07-28 Existentialism and Sociology originally published under the title The Existential Sociology of Jean Paul Sartre is the first work to systematically and critically analyze the existential ideas of Jean Paul Sartre and to demonstrate their importance and connection to central sociological categories found in the theories of Weber Durkheim Freud Mead and others Drawing also on sociological and Hegelian social thought Hayim analyzes key existential concepts of negation temporality choice anguish and bad faith and carefully situates them in the different relations of self to the other relations of indifference and destruction as well as relations of engagement and pledge She joins the two orders of being ontology and sociology and establishes intellectual and ethical continuity between the phenomenology of Being and Nothingness Sartre s momentous early work and neglected sociological categories in his later works Critique of Dialectical Reason and Notebooks for an Ethics Hayim makes accessible to the social scientist a rich repertoire of existential motifs and perspectives on community and group interactions and their inextricable bond to the life practice of the individual Distinguishing among social groups as different orders of social consciousness and organization Hayim addresses issues of transcendence and inertia leadership

and authority freedom and bondage bureaucracy and control and identifies Sartre's concept of the practico inert as the radical center of our intersubjectivity today and its threat to human intelligibility The author contends that the massive language of a sociology of things instills in the human actor a feeling of helplessness and gross inferiority vis a vis the social world She offers in contrast the existential emphasis on the importance of substituting live human experience for mechanistic processes of explanation and of establishing

The Existential Sociology of Jean-Paul Sartre Gila J. Hayim, 1980 In chapter one I cover the basic concepts developed in Being and Nothingness notable those of temporality negation anguish and bad faith In chapter two I move from the individual as the center of free action to the individual in relation to the Other In chapter three I attempt to unify the perspectives in the first two chapters and present a theory of action In chapter four I introduce the reader to the Critique and establish its thematic links with Being and Nothingness In chapter five I analyze the ramifications of the concept of the practico inert which for Sartre is inseparable from human sociality In chapter six I deal with the concept of organization which refers to the contradictions within the social group as it moves into advanced stages of social integration In chapter seven I cover the concepts of power and authority Chapter eight deals with the idea of dialectical humanism and highlights essential concepts in the work by way of concluding it Introduction
