Sociological Theory in the Classical Era

Laura Desfor Edles, Scott Appelrouth, 2009-10-09 This book is a hybrid of text and readings providing both original major writings of sociology's key classical theorists and a theoretical and historical framework written by Edles and Appelrouth with which to better understand the readings. This is a major difference from the traditional reader which can leave students unmotivated when readings are thrown at them one after another with no interpretive guidance or analytical framework. Features Benefits Text plus readings in a hybrid form. The text will provide the interpretive and analytical guidance necessary to interpret the readings. It includes a 30 page introduction, Ch 1 8 14 page introductions in each chapter, 1 2 page article introductions and a 10 15 page conclusion at the end of the book. Theoretical Orientation Diagrams and Core Concepts Diagrams provide students a means to fit the theorist under study into the broader universe of social theory. Significant Others boxes provide information and biographies on theorists who may have followed and derived much of their own perspective from the major theorists featured in each chapter. Discussion questions at the ends of chapters. New to this Edition At least 7 new Significant Others boxes. Each chapter updated with new examples. New readings added to Weber, Marx and Durkheim chapters. New chronological order for readings where possible; where not possible, i.e. it does not fit the logical thematic, to do so there will be an explanation in the introduction as to why the readings are ordered the way they are.

Sociology Samantha Punch, Jeni Harden, Ian Marsh, Mike Keating, 2013 Building upon the success of previous editions, this fourth edition of *Sociology* lays the foundations for a theoretically and methodologically robust understanding of the subject area. Key topics are examined in an accessible and rigorous manner, encouraging reflection within a wide social, cultural and historical context.
