The Politics Of Economic Power In Southern Africa:

The Politics of Economic Power in Southern Africa Ronald T. Libby, 2014-07-14 This book questions the notion that South Africa can exert effective political leverage over its economically dependent neighbors while itself remaining free of regional influences Originally published in 1987 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

A History of South Africa Leonard Thompson, 2014-04-29 A magisterial history of South Africa from the earliest known human inhabitation of the region to the present Lynn Berat updates this classic text with a new chapter chronicling the first presidential term of Mbeki and ending with the celebrations of the centenary of South Africa's ruling African National Congress in January 2012 A history that is both accurate and authentic written in a delightful literary style Archbishop Desmond Tutu Should become the standard general text for South African history Recommended for college classes and anyone interested in obtaining a historical framework in which to place events occurring in South Africa today Roger B Beck History Reviews of New Books [African International Relations](#) Mark W. DeLancey, 2019-03-13 African International Relations is a thoroughly revised and updated bibliography that contains annotated entries for international books and journal articles in the field of African international relations

Geo-economics and Power Politics in the 21st Century Mikael Wigell, Sören Scholvin, Mika Aaltola, 2018-07-06 Starting from the key concept of geo economics this book investigates the new power politics and argues that the changing structural features of the contemporary international system are recasting the strategic imperatives of foreign policy practice States increasingly practice power politics by economic means Whether it is about Iran's nuclear programme or Russia's annexation of Crimea Western states prefer economic sanctions to military force Most rising powers have also become cunning agents of economic statecraft China for instance is using finance investment and trade as means to gain strategic influence and embed its global rise Yet the way states use economic power to pursue strategic aims remains an understudied topic in International Political Economy and International Relations The contributions to this volume assess geo economics as a form of power politics They show how power and security are no longer simply coupled to the physical control of territory by military means but also to commanding and manipulating the economic binds that are decisive in today's globalised and highly interconnected world Indeed as the volume shows the ability to wield economic power forms an essential means in the foreign policies of major powers In so doing the book challenges simplistic accounts of a return to traditional military driven geopolitics while not succumbing to any unfounded idealism based on the supposedly stabilising effects of interdependence on international relations As such it advances our understanding of geo economics as a strategic

practice and as an innovative and timely analytical approach This book will be of much interest to students of security studies international political economy foreign policy and International Relations in general **Regional Great Powers in International Politics** Iver B. Neumann,1992-06-18 Illuminates the interplay between regional concerns and the international context which together define the hierarchy of states Building on case studies this book demonstrates that this status cannot be attained solely by building a military or economic power base **The Politics of Trade and Industrial Policy in Africa** Charles Chukwuma Soludo,Michael Osita Ogbu,Ha-Joon Chang,2004 This book maps the process and political economy of policy making in Africa It s focus on trade and industrial policy makes it unique and it will appeal to students and academics in economics political economy political science and African studies Detailed case studies help the reader to understand how the process and motivation behind policy decisions can vary from country to country depending on the form of government ethnicity and nationality and other social factors *The Politics of Nature and Science in Southern Africa* Maano Ramutsindela,Giorgio Miescher,Melanie Boehi,2016-09-12 This book brings together recent and ongoing empirical studies to examine two relational kinds of politics namely the politics of nature i e how nature conservation projects are sites on which power relations play out and the politics of the scientific study of nature These are discussed in their historical and present contexts and at specific sites on which particular human environment relations are forged or contested This spatio temporal juxtaposition is lacking in current research on political ecology while the politics of science appears marginal to critical scholarship on social nature Specifically the book examines power relations in nature related activities demonstrates conditions under which nature and science are politicised and also accounts for political interests and struggles over nature in its various forms The ecological socio political and economic dimensions of nature cannot be ignored when dealing with present day environmental issues Nature conservation regulations are concerned with the management of flora and fauna as much as with humans Various chapters in the book pay attention to the ways in which nature science and politics are interrelated and also co constitutive of each other They highlight that power relations are naturalised through science and science related institutions and projects such as museums botanical gardens wetlands parks and nature reserves

Norms in International Relations Audie Klotz,2018-09-05 Applying a social constructivist approach to her richly detailed case history Audie Jeanne Klotz demonstrates that normative standards such as racial equality can serve as much more than a weak constraint on fundamental strategic concerns Norms can play a crucial role in the formation of global policy After forty years of protest against apartheid the world celebrated Nelson Mandela s inauguration as South Africa s first democratically elected president Klotz considers why racial discrimination in South Africa became a global concern and why in a remarkable change of practice nations and international organizations adopted sanctions against the Pretoria regime By explaining how the world community actively came to condemn apartheid Norms in International Relations contributes to broader debates on the role of norms in global politics Klotz rehearses a fascinating history combining the power politics of economic sanctions and the normative politics of racial equality She reenacts the events that resulted in the United Nations decision to oppose apartheid The author also analyzes anti apartheid activism in the British Commonwealth and in the Organization of

African Unity and she documents changing attitudes toward South African racial separateness in the United States Britain and Zimbabwe
