**Energy Efficiency** Jenny Palm,2010-08-17 Global warming resulting from the use of fossil fuels is threatening the environment and energy efficiency is one of the most important ways to reduce this threat Industry transport and buildings are all high energy using sectors in the world and even in the most technologically optimistic perspectives energy use is projected to increase in the next 50 years How and when energy is used determines society s ability to create long term sustainable energy systems This is why this book focusing on energy efficiency in these sectors and from different perspectives is sharp and also important for keeping a well founded discussion on the subject

**Energy Efficiency and the Future of Real Estate** N. Edward Coulson,Yongsheng Wang,Clifford A. Lipscomb,2017-08-01 This book explores how energy efficiency is a major component in the development of sustainable real estate Efficiency is one of the most frequently mentioned aspects of government policies for green building design in the United States and around the world There has been a significant amount of effort devoted to the creation of green practices in real estate including building construction building assessment city planning investment governmental regulation and policies and industrial development One of the key emphases of the above activities is energy efficiency thus it is crucial for researchers and readers to have a comprehensive overview of the topic as this book provides

Energy efficiency in the federal government : government by good example? , **The Political Economy of Renewable Energy and Energy Security** E. Moe,P. Midford,2014-09-23 Bringing together renewable energy and energy security this book covers both the politics and political economy of renewables and energy security and analyzes renewable technologies in diverse and highly topical countries Japan China and Northern Europe

**Energy Abstracts for Policy Analysis** ,1979 Mainstreaming Building Energy Efficiency Codes in Developing Countries Feng Liu,Anke S. Meyer,John F. Hogan,2010-10-12 Urbanization and growing wealth in developing countries portend a large increase of demand for modern energy services in residential commercial and public service buildings in the coming decades Pursuing energy efficiency in buildings is vital to energy security in developing countries

and is identified by the Intergovernmental Panel on Climate Change as having the greatest potential for cost effective reduction of CO<sub>2</sub> emissions by 2030 among all energy consuming sectors Building energy efficiency codes BEECs along with energy efficiency standards for major appliances and equipment are broadly recognized as a necessary government intervention to overcome persistent market barriers to capturing the economic potential of energy efficiency gains in the residential commercial and public service sectors Implementation of BEECs help prevent costly energy wastes over the lifecycles of buildings in space heating air conditioning lighting and other energy service requirements Nonetheless achieving the full potential of energy savings afforded by more energy efficient buildings requires holding people who live or work in buildings accountable for the cost of energy services Compliance enforcement has been the biggest challenge to implementing BEECs This report summarizes the findings of an extensive literature survey of the experiences of implementing BEECs in developed countries as well as those from case studies of China Egypt India and Mexico It also serves as a primer on the basic features and contents of BEECs and the commonly adopted compliance and enforcement approaches This report highlights the key challenges to improving compliance enforcement in developing countries including government commitment to energy efficiency the effectiveness of government oversight of the construction sector the compliance capacity of building supply chain and financing constraints The report notes that the process of transforming a country's building supply chain toward delivering increasingly more energy efficient buildings takes time and requires persistent government intervention through uniformly enforced and regularly updated BEECs The report recommends increased international support in strengthening the enforcement infrastructure for BEECs in middle income developing countries For low and lower middle income countries there is an urgent need to assist in improving the effectiveness of government oversight system for building construction laying the foundation for the system to also cover BEECs
