The Politics Of Expertise:

The Politics of Expertise in Congress Bruce Bimber, 1996-08-08 CHOICE 1997 Outstanding Academic Books Nowhere in the U S government is the marriage between expertise and politics more normatively troublesome and empirically obscure than in Congress The legislature is asked to be both expert and representative to act on the best available information and judgment about policy problems while being responsive to and reflective of constituents demands This book examines the relationship between technical experts and elected officials challenging the prevailing view about how experts become politicized by the policy process Bimber presents a theory about the connections between institutional structure and the strategies of experts who participate in politics He tests this theory by tracing the interaction between Congress and the Office of Technology Assessment OTA a recently abolished legislative branch agency created in 1972 to estimate the consequences of new technologies and free Congress from complete dependence on the executive branch for information and policy analysis In addition he provides comparative portraits of Congress's remaining support agencies the Congressional Budget Office the Congressional Research Office and the General Accounting Office and argues that the legislative context for the politics of expertise reveals patterns that have been overlooked in studies of expert knowledge and executive branch policymaking

The Politics of Expertise Stephen P. Turner, 2013-11-07 This book collects case studies and theoretical papers on expertise focusing on four major themes legitimation the aggregation of knowledge the distribution of knowledge and the distribution of power It focuses on the institutional means by which the distribution of knowledge and the distribution of power are connected and how the problems of aggregating knowledge and legitimating it are solved by these structures The radical novelty of this approach is that it places the traditional discussion of expertise in democracy into a much larger framework of knowledge and power relations and in addition begins to raise the questions of epistemology that a serious account of these problems requires

The Politics of Expertise in Congress Bruce Allen Bimber, 1992

Technocracy and the Politics of Expertise Frank Fischer, 1990 This book describes the role of technological experts and expertise in a democratic society It places decision making strategies studied in organization theory and policy studies into a political context Fischer brings theory to bear on the practical technocratic concerns of these disciplines and hopes to facilitate the development of nontechnocratic discourse within these fields The book adopts a critical perspective and addresses the restructuring of the policy sciences

The Politics of Expertise in International Organizations Annabelle Littoz-Monnet, 2017-02-24 This edited volume advances existing research on the production and use of expert knowledge by international bureaucracies Given the complexity technicality and apparent apolitical character of the issues dealt with in global governance arenas evidence based policy making has imposed itself as the best way to evaluate the risks and consequences of political action in global arenas In the absence of alternative democratic modes of legitimation international organizations have adopted this approach to policy making By treating

international bureaucracies as strategic actors this volume address novel questions why and how do international bureaucrats deploy knowledge in policy making Where does the knowledge they use come from and how can we retrace pathways between the origins of certain ideas and their adoption by international administrations What kind of evidence do international bureaucrats resort to and with what implications Which types of knowledge are seen as authoritative and why This volume makes a crucial contribution to our understanding of the way global policy agendas are shaped and propagated It will be of great interest to scholars policy makers and practitioners in the fields of public policy international relations global governance and international organizations **The Politics of Expertise. First Draft** Harvey Molotch,1970*

The Politics of Expertise Ole Jacob Sending,2015-12-15 Experts dominate all facets of global governance from accounting practices and antitrust regulations to human rights law and environmental conservation In this study Ole Jacob Sending encourages a critical interrogation of the role and power of experts by unveiling the politics of the ongoing competition for authority in global governance Drawing on insights from sociology political science and institutional theory Sending challenges theories centered on particular actors authority whether it is the authority of so called epistemic communities the moral authority of advocacy groups or the rational legal authority of international organizations Using in depth and historically oriented case studies of population and peacebuilding he demonstrates that authority is not given nor located in any set of particular actors Rather continuous competition for recognition as an authority to determine what is to be governed by whom and for what purpose shapes global governance in fundamental ways Advancing a field based approach Sending highlights the political stakes disguised by the technical language of professionals and thus opens a broader public debate over the key issues of our time *The Politics of Expertise in Latin America* Miguel A. Centeno,Patricio

Silva,2016-07-27 The ascendancy of technocratic personnel and their imposition of neo liberal economic policies have come to define Latin American politics in the 1980s and 1990s This book is the first comparative analysis of these events and their implications for the future of democracy on the continent Individual chapters discuss the rise to power of these technocrats in Mexico Chile Argentina Brazil and Peru as well as the historical antecedents of expert rule in the 19th and early 20th centuries **The Politics of Expertise** Suzanne Scott Embree,1973 **Think Tanks, Public Policy, and the Politics of Expertise** Andrew Rich,2000 **The Politics of Knowledge** Patrick Baert,Fernando Domínguez Rubio,2013-03-01 Social

scientists often refer to contemporary advanced societies as knowledge societies which indicates the extent to which science knowledge and knowledge production have become fundamental phenomena in Western societies and central concerns for the social sciences This book aims to investigate the political dimension of this production and validation of knowledge In studying the relationship between knowledge and politics this book provides a novel perspective on current debates about knowledge societies and offers an interdisciplinary agenda for future research It addresses four fundamental aspects of the relation between knowledge and politics the ways in which the nature of the knowledge we produce affects the nature of

political activity how the production of knowledge calls into question fundamental political categories how the production of knowledge is governed and managed how the new technologies of knowledge produce new forms of political action This book will be of interest to students of sociology political science cultural studies and science and technology studies

Government Statistical Agencies and the Politics of Credibility Cosmo Wyndham Howard, 2021-03-18 Who decides how official statistics are produced Do politicians have control or are key decisions left to statisticians in independent statistical agencies Interviews with statisticians in Australia Canada Sweden the UK and the USA were conducted to get insider perspectives on the nature of decision making in government statistical administration While the popular adage suggests there are lies damned lies and statistics this research shows that official statistics in liberal democracies are far from mistruths they are consistently insulated from direct political interference Yet a range of subtle pressures and tensions exist that governments and statisticians must manage The power over statistics is distributed differently in different countries and this book explains why Differences in decision making powers across countries are the result of shifting pressures politicians and statisticians face to be credible and the different national contexts that provide distinctive institutional settings for the production of government numbers

The Politics of Expertise in Congress Bruce Allen Bimber, 1996

The Politics of Carbon Markets Benjamin Stephan, Richard Lane, 2014-08-27 The carbon markets are in the middle of a fundamental crisis a crisis marked by collapsing prices fleeing actors and ever increasing greenhouse gas levels Yet carbon trading remains at the heart of global attempts to respond to climate change Not only this but markets continue to proliferate particularly in the Global South The Politics of Carbon Markets helps to make sense of this paradox and brings two urgently needed insights to the analysis of carbon markets First the markets must be understood in relation to the politics involved in their development maintenance and opposition Second this politics is multiform and pervasive Implementation of new techniques and measuring tools policy development and contestation and the structuring context of institutional settings and macro social forces all involve a variety of political actors and create new forms of political agency The contributions study the total extent of the carbon markets from their prehistory to their contemporary expansion and wider impacts This wide ranging political perspective on the carbon markets is invaluable to those studying and interested in ecological markets climate change governance and environmental politics

The Politics of Inclusive Development Samuel Hickey, Kunal Sen, Badru Bukenya, 2015 It is now widely accepted that politics plays a significant role in shaping the possibilities for inclusive development However the specific ways in which this happens across different types and forms of

development and in different contexts remains poorly understood This collection provides a state of the art review regarding what is currently known about the politics of inclusive development Leading academics offer systematic reviews of how politics shapes development across multiple dimensions including through growth natural resource governance poverty reduction service delivery social protection justice systems the empowerment of marginalised groups and the role of both traditional and non traditional donors The volume not only provides a comprehensive update but also a ground breaking range of new directions for thinking and acting around these issues The book s originality thus derives not only from the wide scope of its case study material but also from the new conceptual approaches it offers for thinking about the politics of inclusive development and the innovative and practical suggestions for donors policy makers and practitioners that flow from this
