The Politics Of Gender After Socialism A Comparative Historical Essay:

The Politics of Gender after Socialism Susan Gal, Gail Kligman, 2012-01-06 With the collapse of communism a new world seemed to open for the peoples of East Central Europe The possibilities this world presented and the costs it exacted have been experienced differently by men and women Susan Gal and Gail Kligman explore these differences through a probing analysis of the role of gender in reshaping politics and social relations since 1989 The authors raise two crucial questions How are gender relations and ideas about gender shaping political and economic change in the region And what forms of gender inequality are emerging as a result The book provides a rich understanding of gender relations and their significance in social and institutional transformations Gal and Kligman offer a systematic comparison of East Central European gender relations with those of western welfare states and with the presocialist bourgeois past Throughout this essay the authors attend to historical comparisons as well as cross regional interactions and contrasts Their work contributes importantly to the study of postsocialism and to the broader feminist literature that critically examines how states and political economic processes are gendered and how states and markets regulate gender relations

The Routledge History Handbook of Central and Eastern Europe in the Twentieth Century Włodzimierz Borodziej, Sabina Ferhabdžević, Joachim von Puttkamer, 2020-04-21 *Statehood* examines the extending lines of development of nation state systems in Eastern Europe in particular considering why certain tendencies in state development found a different expression in this region compared to other parts of the continent This volume discusses the differences between the social developments political decisions and historical experience that have influenced processes of state building with a focus on the structural problems of the region and the different paths taken to overcome them The book addresses processes of

building social orders and examines the contribution of state institutions to social and cultural integration and disintegration. It analyses institutional and personnel continuities that have outlasted the great political changes of the twentieth century and addresses the expansion of state activity in shaping property relations in agriculture and industry as well as in social security and family politics. Taking a comparative approach based on experiential history allowing individual experience to be detached from specific national references, the volume delineates a transnational comparison of problems shared within the region as they have been passed down through history, providing definition to the specificity of Eastern Europe and situating the historical experience of the region within a pan-European context. The second in a four-volume set on Central and Eastern Europe in the twentieth century, it is the go-to resource for those interested in statehood and state building in this complex region.
