Dixon, 1981    **The Military Revolution in Korea** Korea (South). Oemubu, 1961    *Soldiers and Politics: the Social Bases of the Military Revolution in Korea* Sang Soo Sul, 1964    *The Darkest Sides of Politics, II* Jeffrey M. Bale, 2017-10-04 This book examines a wide array of phenomena that arguably constitute the most noxious extreme terrifying murderous secretive authoritarian and or anti democratic aspects of national and international politics Scholars should not ignore these dark sides of politics however unpleasant they may be since they influence the world in a multitude of harmful ways The second volume in this two volume collection focuses primarily on assorted religious extremists including apocalyptic millenarian cults Islamists and jihadist terrorist networks as well as CBRN chemical biological radiological and nuclear terrorism and the supposedly new nexus between organized criminal and extremist groups employing terrorist operational techniques A range of global case studies are included most of which focus on the lesser known activities of certain religious extremist milieus This collection should prove to be essential reading for students and researchers interested in understanding seemingly arcane but nonetheless important dimensions of recent historical and contemporary politics    **Proceeding's of the Military History Symposium, USAF Academy** United States. Air Force,    **Double Paradox** Andrew H. Wedeman, 2012-03-15 According to conventional wisdom rising corruption reduces economic growth And yet between 1978 and 2010 even as officials were looting state coffers extorting bribes raking

in kickbacks and scraping off rents at unprecedented rates the Chinese economy grew at an average annual rate of 9 percent In Double Paradox Andrew Wedeman seeks to explain why the Chinese economy performed so well despite widespread corruption at almost kleptocratic levels Wedeman finds that the Chinese economy was able to survive predatory corruption because corruption did not explode until after economic reforms had unleashed dynamic growth To a considerable extent corruption was also a by product of the transfer of undervalued assets from the state to the emerging private and corporate sectors and a scramble to capture the windfall profits created by their transfer Perhaps most critically an anti corruption campaign however flawed has proved sufficient to prevent corruption from spiraling out of control Drawing on more than three decades of data from China as well as examples of the interplay between corruption and growth in South Korea Taiwan Equatorial Guinea and other nations in Africa and the Caribbean Wedeman cautions that rapid growth requires not only ongoing and improved anticorruption efforts but also consolidated and strengthened property rights

The Military and Democracy in Asia and the Pacific Ronald James May, Viberto Selochan, 2004-03-01 In The Military and Democracy in Asia and the Pacific a number of prominent regional specialists take a fresh look at the military's changing role in selected countries of Asia and the Pacific particularly with regard to the countries performance against criteria of democratic government Indonesia Thailand the Philippines Burma Pakistan Bangladesh South Korea Fiji and Papua New Guinea all fall under the spotlight as the authors examine the role which the military has played in bringing about changes of political regime and in resisting pressures for change

**Military Industry in Taiwan and South Korea** Janne E. Nolan, 1986-02-24 Since World War II the United States has done much to support economic political and social development in the Third World At the same time its policies toward developing nations often reflect an overly narrow conception of national and global security in which the influences of the modernization process seem scarcely to have been taken into account Both strains in US policy are mirrored in strong academic traditions upon which policy makers have drawn liberally in the postwar years Developmentalists and security scholars alike will find much that is familiar in the case studies presented in Military Industry in Taiwan and South Korea Dr Nolan's discussion of the stresses of rapid economic and political development in both states draws deeply on the modernization and dependencia studies of the last two decades while her treatment of the security environment within which domestic policies must be made will satisfy the international relationist concerned with states as actors within the international system Throughout Dr Nolan provides a detailed presentation of the behaviour of both polities that will be of interest to North east Asian area specialists and students of US arms policy

*Dictators and their Secret Police* Sheena Chestnut Greitens, 2016-08-16 How do dictators stay in power When and how do they use repression to do so Dictators and their Secret Police explores the role of the coercive apparatus under authoritarian rule in Asia how these secret organizations originated how they operated and how their violence affected ordinary citizens Greitens argues that autocrats face a coercive dilemma whether to create internal security forces designed

to manage popular mobilization or defend against potential coup Violence against civilians she suggests is a byproduct of their attempt to resolve this dilemma Drawing on a wealth of new historical evidence this book challenges conventional wisdom on dictatorship what autocrats are threatened by how they respond and how this affects the lives and security of the millions under their rule It offers an unprecedented view into the use of surveillance coercion and violence and sheds new light on the institutional and social foundations of authoritarian power The military and society : the proceedings...
