The Politics Of Old Age In Europe:

The Politics of Old Age in Europe Alan Walker, Gerhard Naegele, 1999 This collection of essays by leading authorities examines the new politics of old age from the perspectives of individual countries and the European Union as a whole

The politics of old age Martha Doyle, 2015-02-01 The politics of old age in the twenty first century is contentious encompassing ideological debates about the rights and welfare entitlements of individuals in later life An important aspect is the manner in which older people and their representative groups are given the opportunity to articulate their interests in the policy making process Drawing upon key literature in political science social gerontology and cultural sociology The politics of old age explores the relationship between ageing politics and representation It reveals the complexity of older people's representation and how the power the organisations exercise their legitimacy and existence remain highly contingent on government policy design political opportunity structures and the prevailing cultural and socioeconomic milieu This book is essential reading for policymakers and organisations interested in ageing policy and the political process and for students of ageing social policy and political sociology

Politics and Old Age: Older Citizens and Political Processes in Britain John A. Vincent, Guy Patterson, Karen Wale, 2024-11-01 This title was first published in 2001 Older people have been characterized by two mutually contradictory stereotypes One the one hand they have been portrayed as a powerful lobby growing demographically and able to demand large redistributions of the nation's income in their direction On the other hand they have been typified as a marginalized group at high risk of poverty and exclusion and in a political context largely powerless This book examines using original research conducted by the Older People and Politics Project OPPOL within Exeter University's Sociology Department the reality of the impact of the increasing number of older people on the British political process The project had three main investigative concerns how effective are pressure groups and lobbyists for older people how is the power and influence of older people perceived by older people themselves and the general public and how are politicians responding to older people and their needs

The Political Participation of Older People in Europe A. Goerres, 2009-03-26 The first comparative analysis of the political behaviour of older people using evidence from 20 European democracies In contrast to younger people across European societies older people do not behave uniformly For political participation in later life it matters where and when individuals have grown up and in which country they become old

New Dynamics in Old Age Hans-Werner Wahl, Clemens Tesch-Romer, Dr. Andreas Hoff, Jon Hendricks, 2017-07-05 Based on the hypothesis that the new dynamics of old age is best observed in a range of everyday aging contexts that have been undergoing major change since the second half of the 20th century This book is aimed at scholarly community of gerontology in a variety of disciplines sociology psychology demography epidemiology and others

The Oxford Handbook of British Politics Matthew Flinders, Andrew Gamble, Colin Hay, Michael Kenny, 2009-07-16 The study of British politics has been reinvigorated in recent years as a generation of new scholars seeks to build upon a distinct disciplinary heritage while

also exploring new empirical territory and finds much support and encouragement from previous generations in forging new grounds in relation to theory and methods It is in this context that The Oxford Handbook of British Politics has been conceived The central ambition of the Handbook is not just to illustrate both the breadth and depth of scholarship that is to be found within the field It also seeks to demonstrate the vibrancy and critical self reflection that has cultivated a much sharper and engaging and notably less insular approach to the terrain it seeks to explore and understand In this emphasis on critical engagement disciplinary evolution and a commitment to shaping rather than re stating the discipline The Oxford Handbook of British Politics is consciously distinctive In showcasing the diversity now found in the analysis of British politics the Handbook is built upon three foundations The first principle that underpins the volume is a broad understanding of the political It covers a much broader range of topics themes and issues than would commonly be found within a book on British politics This emphasis on an inclusive approach also characterises the second principle that has shaped this collection namely diversity in relation to commissioned authors The final principle focuses on the distinctiveness of the study of British politics Each chapter seeks to reflect on what is distinctive both in terms of the empirical nature of the issue of concern and the theories and methods that have been deployed to unravel the nature and causes of the debate The result is a unique volume that draws upon the intellectual strengths of the study of British politics reflects the innate diversity and inclusiveness of the discipline isolates certain distinctive issues and then reflects on their broader international relevance and finally looks to the future by pointing towards emerging or overlooked areas of research

Active Ageing in the European Union K. Hamblin, 2013-03-25 This book explores the adoption of active ageing policies by EU15 nations and the impact on older peoples work and retirement policy options Policies examined include unemployment benefits active labour market policies partial pension receipt pension principles early retirement and incentives for deferral

Handbook of Aging and the Social Sciences Robert H. Binstock, Linda K. George, Stephen J. Cutler, Jon Hendricks, James H. Schulz, 2011-05-05 The Handbook of Aging and the Social Sciences Sixth Edition provides a comprehensive summary and evaluation of recent research on the social aspects of aging The 25 chapters are divided into four sections discussing Aging and Time Aging and Social Structure Social Factors and Social Institutions and Aging and Society Within this context aging is examined from the perspectives of many disciplines and professions including anthropology bioethics demography economics epidemiology law political science psychology and sociology The Sixth Edition of the Handbook is virtually 100% new material Seventeen chapters are on subjects not carried in the previous edition Seven topics were carried over from the previous edition but written by new authors with fresh perspectives and brought up to date Some of the exciting new topics include social relationships in late life technological change and aging religion and aging lifestyle and aging perceived quality of life economic security in retirement and aging and the law There is also a greater emphasis on international perspectives particularly in chapters on aging and politics diversity and aging and immigration The Handbook will be of use to researchers

and professional practitioners working with the aged It is also suitable for use as a course text for graduate and advanced undergraduate courses on aging and the social sciences

The Encyclopedia of Aging Linda S. Noelker, PhD, Kenneth Rockwood, MD, FRCPC, Richard L. Sprott, Ph.D., 2006-03-17 A COMPREHENSIVE RESOURCE ON GERONTOLOGY AND GERIATRICS Since its inception in 1987 The Encyclopedia of Aging has proven to be the definitive resource for scholars and students across the burgeoning and increasingly interdisciplinary fields of gerontology and geriatrics Like its three esteemed predecessors the fourth edition contains concise readable explorations of hundreds of terms concepts and issues related to the lives of older adults as well as timely coverage of the many new programs and services for the elderly Updated under the distinguished stewardship of editor in chief Richard Schulz to reflect the infusion of new information across the scientific disciplines this new edition brings readers up to the moment significant advances in biology physiology genetics medicine psychology nursing social services sociology economics technology and political science While retaining the format and standard of excellence that marked the first three editions the fourth edition encompasses a wealth of new information from the social and health sciences It contains the most current bibliography of an expanding literature an exhaustive index and extensive cross references This much anticipated update of the field s most authoritative resource will take its place as an indispensable reference for specialists and non specialists across a broad range of disciplines that now comprise the field of aging
