Poor States, Power and the Politics of IMF Reform Mark Hibben, 2016-06-02 This book provides a timely comparative case study that reveals the factors driving the International Monetary Fund's policy reform in Low Income Developing Countries LIDCs as a resurgent IMF expands its footprint in the world's poorest states Through a research design that employs both mainstream and critical IPE theory Mark Hibben uncovers three major tendencies Principal agent analysis he argues demonstrates that coalition formation among powerful states IMF staff and management and other influential actors is necessary for policy reform At the same time he uses constructivist analysis to show that ideational frameworks of what merits appropriate macroeconomic policy response also have an impact on reform efforts and that IMF management and staff seek legitimacy in their policy choices In response to the crises in 1999 and 2008 the author maintains poverty and inequality now matter in IMF thinking and serve as an opportunity for policy insiders and external actors to deepen the institution's new commitment to inclusive growth Finally Hibben draws on neo Gramscian analysis to highlight how the IMF looked to soften the destabilizing effects of globalization through reforms focused on stakeholder participation in poor states and will continue to do so in its support of the new United Nation Sustainable Development Goals This means that the 2015-2030 time period will be a critical juncture for IMF LIDC reform By drawing from diverse theoretical traditions the author thus provides a unique framework for the study of contemporary IMF change and how best those interested in LIDC policy reform can meet this objective

The Politics of Magnate Power in England and Wales, 1389-1413 Alastair Dunn, 2003 This book offers a dramatic revision to the historical understanding of the events surrounding the fall of Richard II and the establishment of the Lancastrian regime Rather than halting at 1399 it charts the shifting balance of power between crown and nobility until the death of Henry IV in 1413 The first major work ever to analyse the financial element of land forfeitures for treason it concludes that Richard II experienced only limited success in profiting from the destruction of his enemies This work is also the first for more than thirty years to chart the

political resistance to Henry IV and assess the reasons for his avoiding the fate of his predecessor. It draws the radically new conclusions that Henry IV recognized the practical limitations of his power as a usurper and in coming to a modus vivendi with his many enemies traded actual security for a diminution in the Crown's authority to command the obedience of its subjects.

The Politics of Shared Power Louis Fisher, 1998. As Congress and the president battle out the federal deficit, foreign involvements, health care, and other policies of grave national import, the underlying constitutional issue is always the separation of powers doctrine. In *The Politics of Shared Power*, a classic text in the field of executive-legislative relations, Louis Fisher explains clearly and perceptively the points at which congressional and presidential interests converge and diverge, the institutional patterns that persist from one administration and one Congress to another, and the partisan dimensions resulting from the two-party system. Fisher also discusses the role of the courts in reviewing cases brought to them by members of Congress, the president, agency heads, and political activists, illustrating how court decisions affect the allocation of federal funds and the development and implementation of public policy. He examines how the president participates as legislator and how Congress intervenes in administrative matters. Separate chapters on the bureaucracy, the independent regulatory commissions, and the budgetary process probe these questions from different angles. The new fourth edition addresses the line-item veto and its tortuous history and prospects. A chapter on war powers and foreign affairs studies executive-legislative disputes that affect global relations, including the Iran-Contra affair, the Persian Gulf War in 1991, and American presence in conflicts such as Haiti and Bosnia. An important new discussion focuses on interbranch collisions and gridlock as they have developed since 1992.

Agamben and the Politics of Human Rights John Lechte, 2013-05-23. Human rights are in crisis today. Everywhere one looks, there is violence, deprivation, and oppression which human rights norms seem powerless to prevent. This book investigates the roots of the current crisis through the thought of Italian philosopher Giorgio Agamben. Human rights theory and practice must come to grips with key problems identified by Agamben: the violence of the sovereign state of exception and the reduction of humanity to bare life. Any renewal of human rights today must involve breaking decisively with the traditional coordinates of Western political thought and instead affirm a new understanding of life and political action.

The Politics of Nuclear Power in Finland Lotta I. Lounasmeri, 2023-05-03. Through a case study based on original interviews, this book offers an analysis of the invisible bonds of trust that hold a community together, extending the local and national perspective. The case of Finland and nuclear company Fennovoima, first working with the German energy company E.ON and later with the Russian state-owned company Rosatom, opens a window onto the Finnish culture of trust: what kind of collective belief system lies at the foundation of public life and decision making in the energy sector? This story can help us look at our own roots and the stories we have grown up with, allowing us to understand ourselves and others as connected to the land in the current era of a seemingly victorious new world order. Those interested in an in-depth analysis of a Northern political culture and its historical roots should read this book. In fact, anyone

interested in current world politics should read this book it is an eye opener to what happens in deeper levels of decision making
