**The Politics of Public Enterprise** Harvey B. Feigenbaum, 2017-03-14 Through a study of French petroleum policy over the last fifty years Harvey B Feigenbaum presents a theoretical analysis of public enterprise and a general analysis of the relationship of state to society Originally published in 1985 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **The Politics of Public**

**Enterprise** Harvey B. Feigenbaum, 1981 **Interest-Group Politics in France** Frank Lee Wilson, 1987 This book represents a comprehensive examination of interest group politics in France focusing on the overall pattern of interaction between interest groups and government Wilson examines the structures and methods of group politics the perspectives and attitudes of group leaders and the place of interest groups in the broader pattern of French politics *Oil, the State, and Federalism* John Erik Fossum, 1997-01-01 John Erik Fossum explores the reasons for the federal government's intervention in the energy industry between 1973 and 1984 and shows how its initial objectives failed culminating in the privatization of Petro Canada in 1990 **The Political Economy of International Air Safety** Vicki L Golich, 1990-01-05 **Globalizing**

**Oil** Llewelyn Hughes, 2014-01-16 Oil is the world's most important commodity It is also one of the most politicized with national oil companies controlling most of the world's reserves Contrary to conventional wisdom Llewelyn Hughes shows that governments across the advanced industrial states responded to the politicization of oil in the 1970s by freeing prices lowering barriers to trade and privatizing national oil companies How did this come about And why do some governments continue to support domestic firms In answering these questions Hughes shows that the politicization of oil also led to a transformation in oil market governance by changing the balance of risk and opportunities facing firms He also shows that their ability to benefit from this change was conditioned by previous attempts to shape the competitive landscape in their favor Hughes study has important implications not only for the politics of oil but also for the study of economic liberalization

*The Political Economy Of Public Sector Reform And Privatization* Ezra Suleiman, John Waterbury, 2019-07-09 This book suggests some of the ways in which levels of development shape public sector reform and privatization in developed and developing countries showing that conservative as well as socialist governments were committed to increasing the state's guiding role in the political economy [The European Union and National Industrial Policy](#) Hussein Kassim, Anand Menon, 2002-09-11 Although the implications of EU membership have been the subject of intense political debate and academic enquiry throughout the member states the actual impact of EU action on those states remains under researched The lack of empirical investigation has meant that it has not been possible to arrive at any informed judgement about how the

EU has affected traditional policy making in the member states or to evaluate competing claims The European Union and National Industrial Policy investigates the extent to which action at the EU level in a range of industrial financial and service sectors has affected the substance of national policy and the behaviour of and relationships between national actors It looks at the policies pursued by the four larger member states in these areas discussing the initiatives launched by the EU and assessing the Union's impact on national policy compared with other internal and external factors The European Union and National Industrial Policy offers a unique investigation of the relationship between the Union and member states that is empirically based and theoretically reflective In an attempt to overcome the boundaries that have traditionally separated international relations political science public policy and other social sciences it uses insights from a number of perspectives to assess the impact of the EU on the ability of member states to choose and implement their goals France and Algeria Phillip Naylor, 2024-06-11 An examination of the complicated history between France and Algeria since the latter's independence While most related studies concentrate on the colonial era and Algeria's War of Independence France and Algeria details the nation's postcolonial relationship Phillip Naylor provides a philosophical approach contending that France reformulated rather than repudiated essential strategic values during decolonization It thus continued to pursue grandeur and independence especially with regard to the Third World and Algeria an essentialism that expedited France's postcolonial transformation But as a new nation Algeria needed to pursue the existential project of self definition It became involved in state building while also promulgating socialism and it recognized how French oil concessions in the Sahara impeded its independence leading to the industry's postcolonial decolonization Finally the postcolonial relationship has featured a human dimension involving immigrants pieds noirs colonial settlers and harkis Algerian soldiers loyal to France all of them central to bilateral relations In this revised and updated edition of his seminal work first published over twenty years ago Naylor expands his coverage of the decolonization era drawing on new information while continuing to study the ever evolving relationship between the two countries These new additions expose the continually shifting relations of power perception and identity between the two states Transnational Regions in Historical Perspective Marten Boon, Hein A.M. Klemann, Ben Wubs, 2019-06-25 National competitiveness has become a misnomer as competitiveness is increasingly understood as a regional phenomenon and regions are not confined to the boundaries of the nation state This book focuses on the Port of Rotterdam and its hinterland i.e. the Lower Rhine and the Ruhr area A transnational perspective is imperative to understand the historical trajectories of the port the hinterland and the region itself This book brings geography and the transnational study of regions back into the historical discipline linking places to larger geographical scales and to systems of production and consumption and the global chains in which they are organised This book will be of interest to scholars and practitioners in urban studies urban planning public policy geography and political science **Markets, States, and Public Policy** Nikolaos Zahariadis, 1995 A theoretical and empirical examination of the move towards privatization *New Departures*

Anthony Perl, 2014-10-17 North America faces a transportation crisis Gas guzzling SUVs clog the highways and air travelers face delays cancellations and uncertainty in the wake of unprecedented terrorist attacks New Departures closely examines the options for improving intercity passenger trains capacity to move North Americans where they want to go While Amtrak and VIA Rail Canada face intense pressure to transform themselves into successful commercial enterprises Anthony Perl demonstrates how public policy changes lie behind the triumphs of European and Japanese high speed rail passenger innovations Perl goes beyond merely describing these achievements translating their implications into a North American institutional and political context and diagnosing the obstacles that have made renewing passenger trains so much more difficult in North America than elsewhere New Departures links the lessons behind rail passenger revitalization abroad with the opportunity to recast the policies that constrain Amtrak and VIA Rail from providing efficient and effective intercity transportation *Fossil Energy Update*, 1982 **Courts, Law, and Politics in Comparative Perspective** Herbert

Jacob, Erhard Blankenburg, Herbert M. Kritzer, Doris Marie Provine, Joseph Sanders, 1996-01-01 This comprehensive book compares the intersection of political forces and legal practices in five industrial nations the United States England France Germany and Japan The authors eminent political scientists and legal scholars investigate how constitutional courts function in each country how the adjudication of criminal justice and the processing of civil disputes connect legal systems to politics and how both ordinary citizens and large corporations use the courts For each of the five countries the authors discuss the structure of courts and access to them the manner in which politics and law are differentiated or amalgamated whether judicial posts are political prizes or bureaucratic positions the ways in which courts are perceived as legitimate forms for addressing political conflicts the degree of legal consciousness among citizens the kinds of work lawyers do and the manner in which law and courts are used as social control mechanisms The authors find that although the extent to which courts participate in policymaking varies dramatically from country to country judicial responsiveness to perceived public problems is not a uniquely American phenomenon *Issues in US-EC Trade Relations* Robert E. Baldwin, Carl B. Hamilton, André

Sapir, 2009-02-15 A viable system of international trade requires the active support of both the United States and the European Community the world's largest trading partners and consequently the primary forces shaping the post World War II international trading regime In recent years however a series of disagreements have threatened the consensus supporting that regime Differences have arisen over the relation of trade policy to balance of trade deficits the terms of and actual compliance with the current General Agreement on Tariffs and Trade and the proper agenda and procedures to be adopted in future multilateral trade negotiations These differences if left unresolved will further weaken an already strained system *Issues in US EC Trade Relations* presents the results of a conference organized by the NBER and the Centre for European Policy Studies In it North American and European trade specialists offer theoretical empirical and historical analyses of some of the major issues on which American and Community officials disagree and also formulate realistic policies for settling

present disputes Contributors consider such topics as the legal aspects of trade between the two regions agricultural policy different ways the United States and members of the European Community use embargoes to attempt to induce foreign countries to change particular political actions the growing trend toward protectionism and responses to this policy international trade in services and trade policy in oligopolistic environments In most cases each general subject is approached from both an American and a European perspective      **Energy Abstracts for Policy Analysis** ,1986

**European Energy Policies in a Changing Environment** Francis McGowan,2012-12-06 Across the European Union energy policy remains a highly controversial issue despite the relative stability of energy markets and the lack of concern of energy availabilities and prices which marked previous debates on the issue The debates on nuclear power in Germany on the coal industry in the UK indicate the continuing resonance of energy policy as a source of dispute at the national level Moreover while the urgency which the 1970s energy crises brought to policy discussions may no longer exist the emergence of new issues such as the environment and economic liberalisation have offered new challenges for energy policy These issues also arise in a European setting Early in 1995 the European Commission published a Green Paper on Energy Policy indeed as the manuscript was completed the Commission was finalising a White Paper and the issue will be on the agenda of the 1996 Intergovernmental Conference The outcome of these discussions is far from clear but there is no doubt that in one way or another the European Union will help to shape national energy policies for many years to come      Resisting Protectionism Helen V. Milner,2021-02-09 Why didn't the protectionist spiral of the 1920s reappear in the 1970s in light of similar economic and political realities In Resisting Protectionism Helen Milner analyzes the growth of international economic interdependence and its effects on trade policy in the United States and France She argues that the limited protectionist response of the 1970s stems from the growth of firms international economic ties which reduces their interest in protection by increasing its cost Thus firms with greater international connections will be less protectionist than more domestically oriented firms The book develops this thesis by examining the international ties of export dependence multinationality and global intra firm trade After studying selected U S industries Milner also examines French firms to see if they respond to increased interdependence in the same way as American firms despite their different historical ideological and political contexts      **The Light-Green Society** Michael Bess,2003-11-15 The accelerating interpenetration of nature and culture is the hallmark of the new light green social order that has emerged in postwar France argues Michael Bess in this penetrating new history On one hand a preoccupation with natural qualities and equilibrium has increasingly infused France's economic and cultural life On the other human activities have laid an ever more potent and pervasive touch on the environment whether through the intrusion of agriculture industry and urban growth or through the much subtler and more well intentioned efforts of ecological management The Light Green Society limns sharply these trends over the last fifty years The rise of environmentalism in the 1960s stemmed from a fervent desire to save wild nature nature conceived as a

qualitatively distinct domain wholly separate from human designs and endeavors And yet Bess shows after forty years of environmentalist agitation much of it remarkably successful in achieving its aims the old conception of nature as a separate sphere has become largely untenable In the light green society where ecology and technological modernity continually flow together a new hybrid vision of intermingled nature culture has increasingly taken its place **Mediating Globalization**

Andrew P. Cortell, 2012-02-01 Has globalization fundamentally altered international relations producing a race to the bottom in which states compete for economic growth and development by adopting similar liberal economic strategies Mediating Globalization challenges this increasingly dominant perspective demonstrating that national governments often respond to global competitive pressures with more not less economic intervention Using interviews archival research and secondary sources Andrew P Cortell explores the strategies adopted by the United States and Britain with regard to one of the world's most globalized sectors the semiconductor industry From the early 1970s through the mid 1990s he argues increasing globalization pressures in each country led them to more actively intervene in the evolution of their semiconductor markets rather than assume a more marginal role The empirical evidence moreover indicates that the two countries adopted similar responses whether liberal or interventionist as a consequence of similar domestic institutional incentives rather than constraints identified to emerge from globalization
