The Politics Of Starvation:

The Politics of Hunger Charles Paul Vincent, 1985 In his study of the Allied blockade of 1915-1919 Vincent examines the rationale and impact of this first large scale use of food as a weapon in the twentieth century Vincent demonstrates that the collapse of the German war effort was induced as much by prolonged hunger as by military reversal Under blockade since 1915 the starving Germans were by 1918 in a state of growing anarchy Remarkably however the armistice ending hostilities specifically required the continuation of the blockade until such time as German signatures had been affixed to a peace treaty

The Politics of Starvation Jack Shepherd, Carnegie Endowment for International Peace, 1975 Report on the obstacles to emergency relief operations and international organization response to the tragedies of drought and starvation in Ethiopia comments on the political aspects and social implications of central government behaviour surveys the magnitude of the famine disaster and the role of UN incl The UN and specialized agencies and suggests a possible new institutional framework for international cooperation in such circumstances References

The politics of hunger Carl J. Griffin, 2020-02-18 The 1840s witnessed widespread hunger and malnutrition at home and mass starvation in Ireland And yet the aptly named Hungry 40s came amidst claims that notwithstanding Malthusian prophecies absolute biological want had been eliminated in England The eighteenth and early nineteenth centuries were supposedly the period in which the threat of famine lifted for the peoples of England But hunger remained in the words of Marx an unremitted pressure The politics of hunger offers the first systematic analysis of the ways in which hunger continued to be experienced and feared both as a lived and constant spectral presence It also examines how hunger was increasingly used as a disciplining device in new modes of governing the population Drawing upon a rich archive this innovative and conceptually sophisticated study throws new light on how hunger persisted as a political and biological force

The Politics of Hunger in India B. Currie, 2000-03-29 Do people starve in democratic polities It is often claimed that as government must respond to public needs in times of crisis democracy has reduced famine in India since Independence This book seeks to identify the processes which generate and perpetuate hunger in India and what sort of intervention by public and private agencies are best suited to combat this problem Drawing on fieldwork in the much publicised Kalahandi district Bob Currie explains why problems of poverty and alleged starvation remain despite regular elections and extensive regional and national publicity

The Politics of Hunger John W. Warnock, 2019-07-19 Originally published in 1987 This important and provocative book explains the persistence of hunger poverty and the lack of balanced development in many countries and the central role of agriculture in economic development Most theories of agricultural development are based on the experiences of western Europe and the United States while the two models for successful late development have been Japan and the Soviet Union This book surveys the evolution of agriculture under colonialism in Latin America Africa and Asia and concludes that this long period distorted the development prospects for these areas and retarded the production of food Under strong state capitalist governments a few

underdeveloped countries have broken the colonial patterns of development However other post revolutionary societies are having far less success because of economic blockades and outside military intervention While the primary focus of the book is on the short run problems of inequality the author examines the long run ecological and resource constraints to a sustainable food system and raising the standard of living in the underdeveloped world

The Politics and Aesthetics of Hunger and Disgust Michel Delville, Andrew Norris, 2017-03-27 This study examines how hunger narratives and performances contribute to a reconsideration of neglected or prohibited domains of thinking which only a full confrontation with the body's heterogeneity and plasticity can reveal From literary motif or psychosomatic symptom to revolutionary gesture or existential malady the double crux of hunger and disgust is a powerful force which can define the experience of embodiment Kafka's fable of the Hunger Artist offers a matrix for the fast while its surprising last page revelation introduces disgust as a correlative of abstinence conscious or otherwise Grounded in Kristeva's theory of abjection the figure of the fraught body lurking at the heart of the negative grotesque gathers precision throughout this study where it is employed in a widening series of contexts suicide through overeating starvation as self performance or political resistance the teratological versus the totalitarian the anorexic harboring of death In the process writers and artists as diverse as Herman Melville Percy Bysshe Shelley Christina Rossetti George Orwell Knut Hamsun J M Coetzee Cindy Sherman Pieter Breughel Marina Abramovic David Nebreda Paul McCarthy and others are brought into the discussion By looking at the different acts of visceral affective and ideological resistance performed by the starving body this book intensifies the relationship between hunger and disgust studies while offering insight into the modalities of the dark grotesque which inform the aesthetics and politics of hunger It will be of value to anyone interested in the culture politics and subjectivity of embodiment and scholars working within the fields of disgust studies food studies literary studies cultural theory and media studies

Hunger John R. Butterly, Jack Shepherd, 2010-12-14 A timely and provocative look at the role political developments and the biology of nutrition play in world famine

the value of the individual and the importance of political action The author draws parallels between Panem and the Roman Empire considering Herod's Massacre of the Innocents alongside Haymitch Abernathy's elusive political influence as mentor of tributes Instructors considering this book for use in a course may request an examination copy here

Hunger, Appetite and the Politics of the Renaissance Stage Matt Williamson, 2021-06-10 Hunger and appetite permeate Renaissance theatre with servants soldiers courtiers and misers all defined with striking regularity through their relation to food Demonstrating the profound ongoing relevance of Marxist literary theory Hunger Appetite and the Politics of the Renaissance Stage highlights the decisive role of these drives in the complex politics of early modern drama Plenty and excess were thematically inseparable from scarcity and want for contemporary audiences such that hunger and appetite together acquired a unique significance as both subject and medium of political debate Focusing critical attention on the relationship between cultural texts and the material base of society Matthew Williamson reveals the close connections between how these drives were represented and the underlying socioeconomic changes of the period At the same time he shows how hunger and appetite provided the theatres with a means of conceptualising these changes and interrogating the forces that motivated them

The Politics of Famine in European History and Memory Ingrid de Zwart, Miguel Ángel del Arco Blanco, 2025-05-15 This is the first book to bring together groundbreaking scholarship focusing on the various ways in which famines result from political decision making and how the threat occurrence relief or memory of famine is instrumentalized as a political and military tool Contributions to this volume reveal the complexities variations and motivations behind the instrumentalization of famine by political actors and regimes and how the politics of perpetrating hunger and the politics of relieving it have often been intertwined They also address how famine legacies have been subsequently politicized in public debates educational practices and popular media and how these socially and politically constructed memories and myths in turn have shaped broader narratives about hunger and humanitarianism both in history and today The Politics of Famine in European History and Memory provides a crucial resource for scholars and students from all disciplines interested in the study of famines as well as those interested in the history of war and troubled pasts more generally

Law and the Political Economy of Hunger Anna Chadwick, 2019-01-31 This book is an inquiry into the role of law in the contemporary political economy of hunger In the work of many international institutions governments and NGOs law is represented as a solution to the persistence of hunger This presentation is evident in the efforts to realize a human right to adequate food as well as in the positioning of law in the form of regulation as a tool to protect society from unruly markets In this monograph Anna Chadwick draws on theoretical work from a range of disciplines to challenge accounts that portray law's role in the context of hunger as exclusively remedial The book takes as its starting point claims that financial traders caused the 2007-8 global food crisis by speculating in financial instruments linked to the prices of staple grains The introduction of new regulations to curb the excesses of the financial sector in order to protect the food insecure reinforces the dominant perception that law can solve the problem Chadwick investigates a number of different legal regimes spanning public international law international economic law transnational governance private law and human rights law to gather evidence for a counterclaim law is part of the problem The character of the contemporary global food system a food system that is being progressively financialized owes everything to law If world hunger is to be eradicated Chadwick argues then greater attention needs to be paid to how different legal regimes operate to consistently privilege the interests of the wealthy few over the needs of poor and the hungry

The Art of Hunger Alys Moody, 2018-11-10 Hunger is one of the governing metaphors for literature in the late nineteenth and twentieth centuries Beginning in the mid nineteenth century writers and critics repeatedly describe writing as a process of starvation as in the familiar type of the starving artist and high art as the rejection of culinary pleasures The Art of Hunger Aesthetic Autonomy and the Afterlives of Modernism argues that this metaphor offers a way of describing the contradictions of aesthetic autonomy in modernist literature and its late twentieth century heirs This book traces the emergence of a tradition of writing it calls the art of hunger from the origins of modernism to the end of the twentieth century It focuses particularly on three authors who redeploy the modernist art of hunger as a

response to key moments in the history of modernist aesthetic autonomy's delegitimization Samuel Beckett in post Vichy France Paul Auster in post 1968 Paris and New York and J M Coetzee in late apartheid South Africa Combining historical analysis of these literary fields with close readings of individual texts and drawing extensively on new archival research this book offers a counter history of modernism's post World War II reception and a new theory of aesthetic autonomy as a practice of unfreedom

The Science of Starving in Victorian Literature, Medicine, and Political Economy Andrew Mangham, 2020-04-24 The Science of Starving in Victorian Literature Medicine and Political Economy is a reassessment of the languages and methodologies used throughout the nineteenth century for discussing extreme hunger in Britain Set against the providentialism of conservative political economy this study uncovers an emerging dynamic way of describing literal starvation in medicine and physiology No longer seen as a divine punishment for individual failings starvation became in the human sciences a pathology whose horrific symptoms registered failings of state and statute Providing new and historically rich readings of the works of Charles Kingsley Elizabeth Gaskell and Charles Dickens this book suggests that the realism we have come to associate with Victorian social problem fiction learned a vast amount from the empirical materialist objectives of the medical sciences and that within the mechanics of these intersections we find important re examinations of how we might think about this ongoing humanitarian issue

Hunger and Famine in the Long Nineteenth Century Gail Turley Houston, 2022-05-19 This volume examines the rhetorics used around race and famine in the colonies vis vis the persistence of hunger and poverty in the island nation empire As William Booth reminded the British in his aptly titled In Darkest England 1890 one need not look further than London's underbelly to find intractable hunger
