

THE EUROPEAN POLITICAL COMMUNITY: INFORMALITY AS A KEY TO SUCCESS

ABSTRACT

The EPC has been established to create 'strategic intimacy' among European countries, at a time when Russian aggression against Ukraine demanded a show of unity and geopolitical resolve. Its lack of standing structures, institutions, budget and even final declarations should be taken as added value and not as a liability. Indeed, the EPC should not be considered as a loose replica of the EU, or as a waiting room for EU aspiring members. Any comparison with the EU fails to capture the real added value of the EPC – an informal format allowing European leaders to freely discuss open issues at 'minilateral' level on the sidelines of the event, without the pressure of political consensus. While European leaders should resist the calls to institutionalise the EPC, they should also be aware of the risk of increasing fatigue, if this format fails to deliver tangible results in the long run. In order for the EPC not to become just a big photo opportunity for the whole European continent, organising host countries (which rotate on a six-month basis on the EU/non-EU country principle) should spend their political capital to keep the EPC a valid geopolitical institution with its distinctive features.

The Politics Of The European Community European Community Studies:

The Politics of the European Community Roy Pryce, 1973 Decision-making in the European Community Emil Joseph Kirchner, 1992 In this first major assessment of EC decision making at the highest levels for ten years Emil Kirchner examines the Council Presidency's role in European integration The author demonstrates how the EC Council Presidency plays a crucial role in the integration process enhanced by the Single European Act and the two Intergovernmental Conferences on EMU and Political Union He evaluates the balance and distribution of power between national and Community actors and asks whether the Council Presidency is primarily an instrument to maintain national control of EC decision making rather than a device for promoting integration He sheds light on the negotiations which led to the SEA and the two Intergovernmental Conferences and argues for a new interpretation of the relationship between the EC and its constituent states EC decision making is not characterised by a transfer of powers from the national to the EC level but by a sharing of competences between national and Community institutions and a pooling of sovereignties among member governments that is analogous to co operative federalism Decision making in the European Community will be vital reading for political scientists and students interested in the EC and for all those seeking to understand European integration potentially the 1990s most important political development *The EU in the Global Political Economy* Finn Laursen, 2009 The EU has become an important international actor Its internal policies often have repercussions far beyond its borders It is also increasingly becoming a proactive global actor defending its interests and projecting its norms and values in both bilateral and multilateral external relations This volume has a special focus on external economic relations and includes chapters on the Euro trade policy and competition policy as well as on specific bilateral relationships The section on relations with industrialized countries deals with the United States Canada Russia Japan and China while the section on relations with developing countries has chapters on administrative reform environmental cooperation Cuba Central America and Iran The book thus gives an up to date overview of important aspects of the EU's external relations With a focus on political economy it traces the continuous interplay of economics and politics that has characterized the EU's development of a fully fledged foreign policy What emerges is a picture of a European Union that is better equipped institutionally to deal with economic rather than political issues **The Politics of European Integration** Michael O'Neill, 2002-09-11 The debate over European integration is a central issue in the study of contemporary Europe This book seeks to guide the student through the most important of the integration theories and academic literature on this vital topic The reader starts with an expansive and wide ranging introductory essay which offers a clear overview and analysis of the shifting terms of the debate on European integration during the post war period Part two provides key extracts from the seminal authors who have contributed to and fashioned this debate throughout its duration It brings together the most important parts from the most essential and influential literature on this important topic This reader will be of value to the growing number of students at both

undergraduate and postgraduate level who are undertaking courses in European studies and European politics It will be especially useful to those who require some knowledge of the origins and developments of this important issue at the centre of the debate over Europe Politics and Bureaucracy in the European Community David Coombes, 2025-09-12 Politics and Bureaucracy in the European Community 1970 examines the European project's key institution the Commission an assessment that also examines the basic principles on which the European Union is based It reveals the Commission to be one of the most curious and interesting political institutions of our time not only from the point of view of international organization but also as a special kind of governmental institution a responsible bureaucracy or independent officialdom

A Green Dimension for the European Community David Judge, 2014-03-05 First Published in 1993 A Green Dimension for the European Community is a collection of nine essays from a range of contributors separated into two parts political issues and processes The theme discusses the idea that the introduction of the Single Market marks a particularly appropriate time to consider the political issues and processes affecting environmental policy in the European Community EC The contributors argue that at such a time and in the face of such threats an understanding of the green dimension of the EC is more than an academic exercise This title concludes with a comprehensive index *The Integration of the European Community and*

Third States in Europe Andrew Evans, 1996 This book examines the legal frameworks for integration provided by the EC Treaty the Free Trade Agreement between Sweden and the EC concluded in 1972 the European Agreement between Poland and the Community and the European Economic Areas EEA The book not only compares the operation of four types of legal framework for integration but also with the assistance of comparisons explores underlying problems in the integration of the European Community and Third States in Europe In the case of many countries of the former Soviet Union notably Russia membership of the Union does not appear to offer a feasible basis for their participation in the European integration process and so the construction of a mutually acceptable legal framework for close relations between such countries and the Community arguably constitutes one of the most serious and pressing problems to be tackled by Union Integration Law The book is written for teachers and students of advanced courses in EU Law as well as for policy makers officials and

practitioners in the private sector whose work concerns relations between the Community and Third states Politics in the European Union Ian Bache, Simon Bulmer, Stephen George, Owen Parker, 2015 This is an account of the main developments in the process of European integration It provides coverage of theory history member states institutions and policies drawing on academic debates including issues of legitimacy and globalisation **The Crisis of Representation in Europe** Jack

Hayward, 2012-10-12 The 1994 European Elections focused public attention on the perception that representatives put integration above public interest The contributors here critically assess the diagnosis of the ailment and the solutions that have been canvassed to remedy its causes and consequences Trade Policy in Multilevel Government Christian

Freudlsperger, 2020-04-11 Trade Policy in Multilevel Government investigates how multilevel polities organize openness in a

globalizing political and economic environment In recent years the multilevel politics of trade caught a broader public's attention not least due to the Wallonian regional parliament's initial rejection of the EU-Canada trade deal in 2016 In all multilevel politics competencies held by states and regions have increasingly become the subject of international rule setting This is particularly so in the field of trade which has progressively targeted so called behind the border regulatory barriers In their reaction to this deep trade agenda constituent units in different multilevel politics have shown widely varying degrees of openness to liberalizing their markets Why is that This book argues that domestic institutions and procedures of intergovernmental relations are the decisive factor Countering a widely held belief among practitioners and analysts of trade policy that involving subcentral actors complicates trade negotiations it demonstrates that the more voice a multilevel polity affords its constituent units in trade policy making the less the latter have an incentive to eventually exit from emerging trade deals While in shared rule systems constituent unit governments are directly represented along the entirety of the policy cycle in self rule systems territorial representation is achieved merely indirectly Shared rule systems are hence more effective than self rule systems in organizing openness to trade The book tests its theory's explanatory power on the understudied case of international procurement liberalization in extensive studies of three systems of multilevel government Canada the European Union and the United States

The European Council Mary Johnston, 2019-07-11 This book presents the history of the transformation of the summit into the European Council EC It considers the political organizational and legal preparations for the increased involvement of heads of government in a more influential EC international and regional role

The Making of EU Foreign Policy K. Smith, 2004-01-13 The Making of EU Foreign Policy argues that there has been a common European Union EU foreign policy towards six countries of Eastern Europe Bulgaria Czech Republic Hungary Poland Romania Slovakia and analyzes why the EU has agreed to the policy The objective of the EU's policy is to support the transformation of Eastern Europe and thus ensure security and stability The most important instrument that the EU has used to reach this objective has been the prospect of enlargement

Inter and Intra Government Arrangements for Productivity Arie Halachmi, Peter B. Boorsma, 2013-03-09 Inter and Intra Governmental Arrangements for Productivity An Agency Approach focuses on public productivity It addresses long standing and current questions on government productivity Its scope and coverage range from theory to very specific applications First of all it demonstrates the applicability of a theoretical framework to concrete issues in the public sector the Principal Agent PA theory or the Agency theory Secondly it demonstrates the different perspectives of this theoretical framework as seen by researchers and practitioners from various countries The volume is based upon the revised seminar papers from a conference that was held at the University of Twente Two trends obvious in this world are its increasing global character and the need for increasingly efficient and effective organizations Inter and intra governmental organizations need to learn to effectively and efficiently work together in complex web like relationships This study forms a major step in that direction It consolidates several current economic concepts that

are highly visible and specifically applies them to various levels and functions of government. It emphasizes that PA theory is a powerful conceptual framework because of the economic focus on transactions between principals and agents. The issues of information asymmetry across government constituents, political/diplomatic considerations, and the narrow focus of PA problems will be described. Attention is also given to the issues of citizen demands, internal markets, franchising, competitive procurement, and contracting. The study concentrates on academic thinking about the applicability of PA concepts to administrative theory building. As such, it makes a current, valid contribution to the knowledge and practice of public administration world wide.

A Dictionary of the European Union Lee McGowan, David Phinnemore, 2004-04-29. Concise definitions and explanations on all aspects of the European Union.

Participatory Governance Jürgen Grote, Bernard Gbikpi, 2013-11-11. W hrend der Governance Begriff wissenschaftlich als konsolidiert gelten d rfte gibt es Probleme bei der praktischen Umsetzung der mit ihm verbundenen Idee. Das englischsprachige Buch misst einige der im Whitebook on Governance der EU Kommission angesprochenen Problemfelder aus und tr gt so zur Operationalisierung des Begriffes bei.

Integrating Europe Jeffrey Stacey, 2010-04-15. In *Integrating Europe: Informal Politics and Institutional Change* the author explains why the European Union (EU) member states actively surrender policy making power to supranational authorities in unconventional ways. In light of the general antipathy toward giving up national sovereignty in European societies even where pro European sentiment thrives, why do national governments allow the creation of any new EU laws or policies whose effects they cannot keep under their general control? Why do EU member states allow any sovereignty transfer to occur outside of inter governmental treaties which are the only legitimate EU bargains found in the EU's formal sphere? Deploying the tools of rational choice/institutionalist theory, the author argues that informal bargains struck between the EU's primary organizational actors, the European Council, European Commission, and European Parliament, have paradoxically resulted in increased integration. As the EU is an ideal laboratory for testing different institutionalist hypotheses for explaining institutional change, the author focuses on the ongoing competition to alter the EU rules that allocate power and with an approach that allows for feedback loops among agents and structures, makes an argument that flies in the face of realist and intergovernmentalist theories. While some have shed light on the importance of informal dynamics in the legal sphere of the EU, this book does the same for the policy making sphere.

The Union and the World: The Political Economy of a Common European Foreign Policy Alan Cafruny, Patrick Peters, 2023-08-21. During the last decade, Europe has been transformed both politically and commercially. The establishment of a genuinely single marketplace in the context of an expanding membership has enabled the European Union greatly to enhance its role on the world stage. In the areas of trade and commercial policy, the Union increasingly speaks with one voice. As a result of the Maastricht Treaty on Economic and Political Union of 1993, a process has been set in motion whereby the embryonic mechanisms of a common foreign policy (European Political Cooperation or EPC) are gradually evolving into a more comprehensive Common Foreign and Security Policy (CFSP). The

contributors to this volume describe and evaluate the nature and extent to which the European Union plays an independent role in international affairs This pioneering work makes an important contribution to the literature on the European Union since the chapters present a comprehensive picture of the Union's foreign economic policies and actions its foreign security policy and the supranational nature of much Union decision making The book is significant not only because of its dual focus on economics as well as politics but also because it comprehensively covers the broad range of Union policies in both the economic and political spheres The intended level of readership is undergraduate courses on the EU and on European politics upper level undergraduate courses in International Relations and graduate survey courses on the EU The book is sufficiently comprehensive and instructive to achieve a wide readership especially in North America and the UK

European Union and New Regionalism Mario Telò, 2018-02-06 This title was first published in 2001 This is a collection of papers that look at the structure of the global economy and its changing paradigms over the years The contributors look at how the classic concept of state autonomous sovereign and freed of all constraint never really reflected the reality of the international scene despite the role it has played in realist and neo realist theory for many decades Instead they consider that the political social and economic characteristics originally attributed to states seem increasingly to be expressed through regional constructs The papers in this volume show that even within regionalism there are a variety of different models that exist and examine five of those models the European Union Mercosul Mercosur the North American Free Trade Area NAFTA the Association of South East Asian Nations ASEAN and the South African Development Community SADC

The European Union and Enlargement G. Christou, 2004-10-15 The European Union and Enlargement is about the EU's power of attraction an exploration of the potential for EU impact on conflicts within Europe and the implications for the EU to influence the order beyond its borders It provides both a theoretical and historical context in order to understand the EU's impact and combines this with empirical analysis of the perceptions of the Greek Cypriots Turkish Cypriots and Turkey on the accession process and its effect on the Cyprus issue It demonstrates the limits and the potential of the EU as a global actor through its power of attraction

From State to Market? Vivien A. Schmidt, 1996-04-26 The Mitterrand years saw the transformation of business and its relationship to government From State to Market first published in 1996 details the governmental policies toward business that went from nationalization to privatization deregulation and ever increasing European integration bringing with them the move from a dirigiste or state directed economy to a more market oriented one Professor Schmidt profiles the players the interpenetrating elite of top business and government officials who share common state educational history and career track and who as the beneficiaries of the all pervasive culture of the state have managed not only to maintain their hold in the ministries but also to colonize industry This book which spans the fields of public policy and political economy contains both empirical information the results of over forty interviews with top business and government officials and a theoretical framework that sets French state society relations in comparative perspective
