The Politics Of World Hunger:

The Politics of World Hunger Paul Simon, Arthur R. Simon, 1973 Overview of world underdevelopment with particular reference to the economic policy implications for the USA of poverty and hunger in the developing countries and the possible role of USA commitments stresses the political aspects of economic development and the potential conflicts inherent in the increasing income disparities among nations and covers American foreign policy world overpopulation development aid agricultural development the environment etc References *The Politics of Hunger* John W. Warnock, 2019-07-19 Originally published in 1987 This important and provocative book explains the persistence of hunger poverty and the lack of balanced development in many countries and the central role of agriculture in economic development Most theories of agricultural development are based on the experiences of western Europe and the United States while the two models for successful late development have been Japan and the Soviet Union This book surveys the evolution of agriculture under colonialism in Latin America Africa and Asia and concludes that this long period distorted the development prospects for these areas and retarded the production of food Under strong state capitalist governments a few underdeveloped countries have broken the colonial patterns of development However other post revolutionary societies are having far less success because of economic blockades and outside military intervention While the primary focus of the book is on the short run problems of inequality the author examines the long run ecological and resource constraints to a sustainable food system and raising the standard of living in the underdeveloped world World Hunger Nicole Ball, 1981 Alternate call HD9000 5 F7 B34 **World Hunger** Joseph Collins, 2014-02-04 The revised edition of this text includes substantial new material on hunger in the aftermath of the Cold War global food production versus population growth changing demographics and falling birth rates around the world the shifting focus of foreign assistance in the new world order structural adjustment and other budget slashing policies trade liberalization and free trade agreements famine and humanitarian interventions and the third worldization of developed nations *The Politics of Food Insecurity in Canada and the United Kingdom* Zsolt Mendl-Zambo, Dennis Raphael, 2025-01-07 Addressing a neglected area in academic research media coverage and public understanding this book takes a critical political economy approach to understanding food insecurity in Canada and the UK It examines how current economic and political systems create food insecurity and why food charity does little to address the problem diverting the attention of policy makers the media and the public from the sources of food insecurity This book provides a vision of a future whereby public control over the distribution of resources including food will eliminate food insecurity and other conditions that threaten health **Religious Voices in the Politics of International Development** Paul J. Nelson, 2021-04-15 This first study of faith based development NGOs FBOs political roles focuses on how U S FBOs in international development educate and mobilize their constituencies Most pursue cautious reformist agendas but FBOs have sometimes played important roles in social movements Nelson unpacks those political roles by examining the prominence of advocacy in the

organizations the issues they address and avoid their transnational relationships and their relationships with religious and secular social movements The agencies that educate and mobilize U S constituencies most actively are associated with small Christian sects or with non Christian minority faiths with historic commitments to activism or service Specialized advocacy NGOs play important roles and emerging movements on immigration and climate may represent fresh political energy The book examines faith based responses to the crises of climate change COVID 19 and racial injustice and argues that these will shape the future of religion as a moral and political force in America and of NGOs in international development *The Political Economy of Hunger: Volume 1: Entitlement and Well-being* Jean Dreze (ed), Amartya Sen, 1990 Part of a major report on world hunger instigated by the World Institute for Development Economics Research this volume deals with possible solutions to the problem of regular outbreaks of famine in various parts of the world
