The Politics Within Jarol B. Manheim,1982 *Invisible Politics* Hanes Walton,1985-01-01 With a view that behavioralism has distorted perceptions of black political activity Hanes Walton Jr here reformulates the assumptions of behavioralism to arrive at a more realistic understanding of the political actions of black Americans Considering the cultural and historical events that have shaped black lives Walton examines voting patterns socialization and the development of political opinion his analysis of leadership includes not only legislative and judicial leaders but also leaders of those organizations so influential in black political culture civil rights churches and grassroots organizations Whether he looks at how local politics have changed through the years of civil rights action or how blacks ideas on foreign policy have developed Walton provides a long needed reassessment of the role of black participation in American politics Primate Politics

Elections and Conflict Management in Africa Timothy D. Sisk,Andrew Reynolds,1998 Elections have emerged as one of the most important and most contentious features of political life on the African continent In the first half of this decade there were more than 20 national elections serving largely as capstones of peace processes or transitions to democracies The outcomes of these and more recent elections have been remarkably varied and the relationship between elections and conflict management is widely debated throughout Africa and among international observers Elections can either help reduce tensions by reconstituting legitimate government or they can exacerbate them by further polarizing highly conflictual societies This timely volume examines the relationship between elections especially electoral systems and conflict management in Africa while also serving as an important reference for other regions The book brings together for the first time the latest thinking on the many different roles elections can play in democratization and conflict management

Electoral Systems and Democratization in Southern Africa Andrew Reynolds, 1999-01-28 The design of electoral systems and executive types is increasingly being recognized the key lever of constitutional engineering to be applied in the interests of political accommodation and stability in ethnically divided societies In this groundbreaking comparative study of democratic design in Southern Africa Andrew Reynolds finds that the decisions about how to constitute representative parliaments have wide ranging effects on the type of parties and party system that develops the nature of executive legislative relations and the inclusiveness of both majority and minority interests in the process of governance While electoral system design is the primary focus of the book the related constitutional issues of whether to choose a presidential or parliamentary system and whether to entrench consensual consociational or majoritarian government are also discussed Analysing the experiences of Malawi Namibia South Africa Zambia and Zimbabwe the author presents a host of revealing conclusions that help shed light on the success or failure of democratic design in other fledgling democracies in both Africa and beyond

Making Citizens Zev M. Trachtenberg, 2013-01-11 By analysing Rousseau s conception of the general will Zev Trachtenberg characterises the attitude of civic virtue Rousseau believes individuals must have to cooperate successfully in society Rousseau holds that culture affects political life by either fostering or discouraging civic virtue However while the cultural institutions Rousseau endorses would motivate citizens to obey the law they would not prepare citizens to help frame it Rousseau s view of culture thus works against his account of legitimacy and Trachtenberg concludes that Rousseau s political theory as a whole is inconsistent
