**The Positive Stress Factor** Rebecca Jo Holmes, Mary Lee Webb, 1995-04-01

**The Positive Psychology of Personal Factors** Dana S. Dunn, Michael L. Wehmeyer, 2022-01-17 Historically interventions designed to impact the lives of disabled people were predicated upon deficits based models of disability This began to change with the introduction of World Health Organization WHO frameworks particularly the International Classification of Function ICF that emphasized that disability could only be understood in the context of interactions among health environmental factors and personal factors and by examining the impact of such factors on a person s activities and participation The ICF identified personal factors as among the elements of a social ecological model of disability but did not provide an extensive taxonomy of what constitutes such factors The Positive Psychology of Personal Factors examines personal factors that come from the field of positive psychology and as such to begin to identify and build strengths based approaches to promoting the full participation dignity and well being of disabled people
