## **The Power Of Being Creative Featuring The Story Of Thomas Edison:**

*The Power of Being Creative* Patricia Metten, 1984 Biography of the famous inventor Thomas Edison      *Documentary, World History, and National Power in the PRC* Gotelind Mueller, 2013-10-30 Documentaries have recently become a favourite format for Chinese state directed media to present an officially sanctioned view of history Indeed this is not confined to Chinese national history In stark contrast to the earlier self centred preoccupation with Chinese history there has been an upsurge in interest in foreign history with a view to illuminating China's role not only in world history but also on the global stage today and in the future This book examines three recent Chinese documentary television series which present the officially sanctioned view of the rise of the modern West the reasons for the end of the Soviet Union and the legitimisation of the present day Chinese government via a specific reading of modern Chinese history to argue for a Chinese rise in the future With a focus on these documentaries Gotelind M ller discusses how history is presented on screen and explores the function of visual history for memory culture and wider society Further this book reveals how the presentation of Chinese and foreign history in a global framework impacts on the officially transmitted views on Self and Other and thus provides a keen insight into how the Chinese themselves regard their global rise Documentary *World History and National Power in the PRC* will be welcomed by students and scholars working across a number of fields including Chinese studies East Asian studies media studies television studies history and memory studies      **Organizing Creativity** Stephan M.

Schaefer, 2023-09-22 Creativity is a defining feature of contemporary work life Who has not taken part in brainstorming sessions read glossy pamphlets about innovation and creativity as important cornerstones of a new business strategy or been made aware of the importance of creative skills for one's career But what does it mean to be creative in and as an organization *Organizing Creativity* provides an answer to this question The book builds on the premise that creativity is essentially about ideas Every organization is dependent on valuable ideas for solving everyday problems as well as inventing new processes products or services The main argument of the book is that an analysis of organizational creativity should always account for the interdependency of context process and practice Based on cultural and processual perspectives it highlights the implications of context process and practice for different aspects of the creative process generating evaluating and facilitating ideas Furthermore it reflects on how dominant notions of creativity in the economy and society prevent transformative changes and suggests a radical transformative approach to organizing creativity as an alternative To support and illustrate its argument *Organizing Creativity* draws on abundant empirical examples case illustrations and seminal research from Sociology Social Psychology and Organization Studies It provides us with a multi dimensional perspective and will both further our understanding of and spark critical reflection on the complex interplay of the organizational social and cultural contexts processes and practices of organizing creativity      **Organizing Creativity** Stephan M. Schaefer, 2023 The introductory chapter places creativity in a historical context It shows how objectivist and subjectivist research philosophies

have emerged and how they relate to technical practical and emancipatory knowledge interests which inform the study of organizational creativity Based on a sensitizing concept of organizational creativity the chapter then suggests context process and practice as the conceptual framing for the subsequent arguments of the book      **Becoming Earth** Anne Reinertsen,2016-03-22 Becoming earth is about how we can write and tell stories in a way that allows us to collaborate and be stewards and partners of the natural world our earth rather than dominators of it That is what this assemblage is about about trying to take seriously the minor politics of sensing experimenting with questions of attending and attuning to difference contestation nomadism relationality and permeability in sensing cultivating muchness newness communities of acceptance and decision making Going beyond the binaries dualisms instrumentalist criteria etc and supplying third space conceptions of agency not tied to human action alone but rather examining human and more than human relational assemblages of affecting and being affected The tasks for educators becoming not merely people who pass on traditions institutions systems and or structures but prepare for future contingent events ultimately creates vital pedagogies of many prospects in our classrooms and exceeds forms of contracts between generations These are embodied ecologies and or enacting ecologies in practice showing the practical and political strength of new materialisms and presenting its potential and usefulness to simultaneously work and analyse local and global political strategies and sustainability Making virtuality productive as a form of life our wonderings are thus always stronger than our assertions The sometimes fierce stories in this book might light some paths      **Your Creative Power** Alex Osborn,2008-11-18 Alex Osborn wrote the following Emotional drive is self starting and largely automatic whether based on hunger fear love or ambition For all of us a good rule is always to encourage ideas to encourage speaking up as well as thinking up Whatever creative success I gained was due to my belief that creative power can be stepped up by effort and that there are ways in which we can guide our creative thinking If we set aside a defined period for creative thinking we can best lure the muse With enough creative effort each of us could find the ideas that would smooth out rocky roads      **Creativity – A Sociological Approach** Monika E. Reuter,2015-09-17 Introducing the first macro sociological perspective on the concept of creativity this book includes a review of ten domains which have studied creativity It also explores the results of a six year on going research project comparing students ideas on creativity with employers and industry professionals views      *Organizational Creativity* Gerard J.
