Rethinking the Power of Maps Denis Wood, 2010-04-16 A contemporary follow up to the groundbreaking Power of Maps this book takes a fresh look at what maps do whose interests they serve and how they can be used in surprising creative and radical ways Denis Wood describes how cartography facilitated the rise of the modern state and how maps continue to embody and project the interests of their creators He demystifies the hidden assumptions of mapmaking and explores the promises and limitations of diverse counter mapping practices today Thought provoking illustrations include U S Geological Survey maps electoral and transportation maps and numerous examples of critical cartography participatory GIS and map art

The Power of Maps Denis Wood, John Fels, 1993 This text re-examines the maps we have known all our lives to reconsider what and how they tell us about the places we know and the places we learn about The pretence of objective scientific map making is demolished as the author explores how maps can change the way we see our world

The Algebra of Secondary Cohomology Operations Hans-Joachim Baues, 2006-06-12 The algebra of primary cohomology operations computed by the well known Steenrod algebra is one of the most powerful tools of algebraic topology This book computes the algebra of secondary cohomology operations which enriches the structure of the

Steenrod algebra in a new and unexpected way The book solves a long standing problem on the algebra of secondary cohomology operations by developing a new algebraic theory of such operations The results have strong impact on the Adams spectral sequence and hence on the computation of homotopy groups of spheres *The power of maps*, 1992 *The Power of Projections* Arthur Jay Klinghoffer, 2006-04-30 Why is Europe at the top half of maps and Africa at the bottom Although we are accustomed to that convention it is in fact a politically motivated almost entirely subjective way of depicting a ball spinning in space As *The Power of Projections* teaches us maps do not portray reality only interpretations of it To begin with they are two dimensional projections of a three dimensional spherical Earth Add to that the fact that every map is made for a purpose and its design tends to reflect that purpose Finally a map is often a psychological projection of the historical political and cultural values of the cartographer or of the nation person or organization for which the map was created In this fascinating book Klinghoffer examines the world perceptions of various civilizations and the ways in which maps have been formulated to serve the agendas of cartographers and their patrons He analyzes the recent decline of sovereignty the spread of globalization the reassertion of ethnic identity and how these trends affect contemporary mapmaking **The Gospel according to st. Graham Burnett, 2000 Chronicling the British pursuit of the legendary El Dorado *Masters of All They Surveyed* tells the fascinating story of geography cartography and scientific exploration in Britain's unique South American colony Guyana How did nineteenth century Europeans turn areas they called terra incognita into bounded colonial territories How did a tender footed gentleman predisposed to seasickness and unable to swim make his way up churning rivers into thick jungle arid savanna and forbidding mountain ranges survive for the better part of a decade and emerge with a map What did that map mean In answering these questions D Graham Burnett brings to light the work of several such explorers particularly Sir Robert H Schomburgk the man who claimed to be the first to reach the site of Raleigh's El Dorado Commissioned by the Royal Geographical Society and later by the British Crown Schomburgk explored and mapped regions in modern Brazil Venezuela and Guyana always in close contact with Amerindian communities Drawing heavily on the maps reports and letters that Schomburgk sent back to England and especially on the luxuriant images of survey landmarks in his *Twelve Views in the Interior of Guiana* reproduced in color in this book Burnett shows how a vast network of traverse surveys illustrations and travel narratives not only laid out the official boundaries of British Guiana but also marked out a symbolic landscape that fired the British imperial imagination Engagingly written and beautifully illustrated *Masters of All They Surveyed* will interest anyone who wants to understand the histories of colonialism and science *Shifting Toponymies* Luisa Caiazzo, I.M. Nick, 2020-11-13 Far from being objective and static pointers place names are dynamic tools of inscription used to re shape both our surroundings and our identities This book examines the shifting tides in the complex relationship between places identities and toponyms to unveil the multilayered embeddedness of

re naming practices The volume presents original contributions to this rich field of enquiry and fosters a multidisciplinary approach in exploring the broad theme of re naming and identity Ranging from theoretical discussions to in depth case studies the chapters featured here investigate the often controversial but ever fascinating relationship between toponyms and identity As a privileged medium of expression place names constitute both an instrument and a vehicle for conveying identity values and visions of the world across space and time The multifaceted geopolitical historical and linguistic issues tackled here make this volume a valuable resource to academics and postgraduate students from a broad spectrum of disciplines including onomastics and linguistics sociology history government planning and policy Holocaust studies postcolonial studies and media studies
