The Precolumbian Ballgames A Panmesoamerican Tradition:

The Pre-Columbian Ballgames Stephan Francis De Borhegyi, 1980 *The Mesoamerican Ballgame* Vernon L. Scarborough, David R. Wilcox, 1993-01-01 The Precolumbian ballgame played on a masonry court has long intrigued scholars because of the magnificence of its archaeological remains From its lowland Maya origins it spread throughout the Aztec empire where the game was so popular that sixteen thousand rubber balls were imported annually into Tenochtitlan It endured for two thousand years spreading as far as to what is now southern Arizona This new collection of essays brings together research from field archaeology mythology and Maya hieroglyphic studies to illuminate this important yet puzzling aspect of Native American culture The authors demonstrate that the game was more than a spectator sport serving social political mythological and cosmological functions it celebrated both fertility and the afterlife war and peace and became an evolving institution functioning in part to resolve conflict within and between groups The contributors provide complete coverage of the archaeological sociopolitical iconographic and ideological aspects of the game and offer new information on the distribution of ballcourts new interpretations of mural art and newly perceived relations of the game with material in the Popol Vuh With its scholarly attention to a subject that will fascinate even general readers *The Mesoamerican Ballgame* is a major contribution to the study of the mental life and outlook of New World peoples **Ritual and Economy in a Pre-Columbian Chiefdom** Kenneth Hirth, Susan Hirth, George Hasemann, Gloria Lara-Pinto, 2023-09-29 This volume examines the organization and ritual economy of a pre Columbian chiefdom that developed in central Honduras over a 1 400 year period from 400 BC to AD 1000 Extremely applicable and broadly important to the archaeological studies of Mesoamerica *Ritual and Economy in a Pre Columbian Chiefdom* models the ritual organization of pre Columbian societies across Honduras to expand the understanding of chiefdom societies in Central America and explore how these non Maya societies developed and evolved As part of the ritual economy a large quantity of jade and marble artifacts were deposited as offerings in the ritual architecture of the El Cajón region's central community of Salitrón Viejo Over 2 800 of these high value items were recovered from their original ritual contexts making Salitrón Viejo one of the largest in situ collections of these materials ever recovered in the New World These materials are well dated and tremendously varied and provide a cross section of all jade carving lapidary traditions in use across eastern Mesoamerica between AD 250 and 350 With a complementary website providing extensive additional description visualization and analysis <https://journals.psu.edu/opa/issue/view/3127> *Ritual and Economy in a Pre Columbian Chiefdom* is a new and original contribution that employs an economy of ritual approach to the study of chiefdom societies in the Americas It is a foundational reference point for any scholar working in Mesoamerica and Central America especially those engaged in Maya research as well as archaeologists working with societies at this scale of complexity in Latin America and around the world **Pre-Columbian Ballgame** Nicholas M. Rush,2013-07-30 Entheogens and the Development of Culture makes the radical proposition that mind altering substances have played a major part not only in cultural development but also in human brain development Researchers suggest that we have purposely enhanced receptor sites in the brain especially those for dopamine and serotonin through the use of plants and fungi over a long period of time The trade off for lowered functioning and potential drug abuse has been more creative thinking or a leap in consciousness Experiments in entheogen use led to the development of primitive medicine in which certain mind altering plants and fungi were imbibed to still fatigue pain or depression while others were taken to promote hunger and libido Our ancestors selected for our neural hardware and our propensity for seeking altered forms of consciousness as a survival strategy may be intimately bound to our decision making processes going back to the dawn of time Fourteen essays by a wide range of contributors including founding president of the American Anthropological Association s Anthropology of Religion section Michael Winkelman PhD Carl A P Ruck PhD Boston University professor of classics and an authority on the ecstatic rituals of the god Dionysus and world renowned botanist Dr Gaston Guzman member of the Colombian National Academy of Sciences and expert on hallucinogenic mushrooms demonstrate that altering consciousness continues to be an important part of human experience today Anthropologists cultural historians and anyone interested in the effects of mind altering substances on the human mind and soul will find this book deeply informative and inspiring **Function and Meaning in Classic Maya Architecture** Stephen D. Houston,1998 These articles mark a significant stage in the study of Maya architecture and the society that built it They represent advances in our understandings of the past point toward avenues for further studies and note the distance yet to travel in fully appreciating and understanding this ancient American culture and its material remains **Blood and Beauty** Rex Koontz,Heather Orr,2009-12-31 Warfare ritual human sacrifice and the rubber ballgame have been the traditional categories through which scholars have examined organized violence in the artistic and material records of ancient Mesoamerica and Central America This volume expands those traditional categories to include such concerns as gladiatorial like boxing combats investiture rites trophy head taking and display dark shamanism and the subjective pain inherent in acts of violence Each author examines organized violence as a set of practices grounded in cultural understandings even when the violence threatens the limits of those understandings The authors scrutinize the representation of and relationships between different types of organized violence as well as the implications of those activities which can include the unexpected such as violence as a means of determining and curing illness and the use of violence in negotiation strategies Secrets in Stone Edwin M. Shook,Elayne Marquis,1996 Yokes hachas and palmas are three pre Columbian art forms that occur in a specific region of Mexico and Central America and apparently have no exact counterparts anywhere else This volume focuses on these carved stone objects which have puzzled art historians and

archaeologists since the mid 19th century The corpus of data presented here consisting of photo documentation identification and interpretation of 661 sculptures was assembled by the two authors over many years beginning in the early 1940s
