The Present As History

Eric Voegelin

The Present As History:

History of Rationalism; embracing a Survey of the present State of Protestant Theology John Fletcher Hurst,1865 **The Concept of History** Dmitri Nikulin,2017-01-26 The Concept of History reflects on the presuppositions behind the contemporary understanding of history that often remain implicit and not spelled out It is a critique of the modern understanding of history that presents it as universal and teleological progressively moving forward to an end Although few contemporary philosophers and historians maintain the view that there is strict universality and teleology in history the remnants of these positions still affect our understanding of history But if history is not universal and singular evolving toward an objective universal end it should be possible to admit of multiple histories some of which we appropriate as our own An another important aspect of this book is that it provides an account of history that is itself both historical and rooted in attempts to narrate and explain history from its inception in antiquity The book seeks to establish features or constituents of history that might be found in any historical account and might themselves be considered historical invariants in history

interpretation of Foucault's work by focusing on its methodological, procedural and epistemological elements. Adam Takacs argues that despite all its thematic and analytical diversity, Foucault's procedure can be understood within a unified framework based on the historical problematization of the present. This procedure, triggered by current social issues and aiming at a diagnostic screening of the present through a constructive exploration of the past, thus sets in motion not only a specific philosophical vision of history and a research practice often related to the procedures of historiography but also new ways of critical analysis of social phenomena. This book subjects all these elements to a systematic analysis, demonstrating that within this framework, Foucault's often debated views on historical realism and constructivism, his methodological choices and ontological commitments take on a coherent profile culminating in a timely social critical project of liberation of knowledge and political subjectivation.
