**Dilemmas of Presidential Leadership** Richard Ellis, Aaron B. Wildavsky, 1989-01-01 Dilemmas of Presidential Leadership challenges the widely accepted distinction between traditional and modern presidencies a dichotomy by which political science has justified excluding from its domain of inquiry all presidents preceding Franklin Roosevelt Rather than divide history into two mutually exclusive eras Richard Ellis and Aaron Wildavsky divide the world into three sorts of people egalitarians individualists and hierarchs All presidents the authors contend must manage the competition between these rival political cultures It is this commonality which lays the basis for comparing presidents across time To summarize and simplify the book addresses two general categories of presidencies The first is the president with a blend of egalitarian and individualist cultural propensities Spawned by the American revolution this anti authoritarian cultural alliance dominated American politics until it was torn asunder by what Charles Beard has called the second American revolution the Civil War The Jeffersonian and Jacksonian presidents labored with varying degrees of success to square the exercise of authority with their own and their followers anti authoritarian principles They also were faced with intraparty conflicts that periodically flared up between egalitarian and individualist followers The president with hierarchical cultural propensities faced different problems While the precise contours of the dilemma varied all straggled in one way or another to reconcile their own and their party's preferences with the anti hierarchical ethos that inhered in the society and the polity Hierarchical presidents like Washington and Adams were hamstrung by this dilemma as were Whig leaders like Henry Clay and Daniel Webster who aspired to the presidency but never achieved it Abraham Lincoln's greatness resided in part in his ability to resolve the hierarchy's dilemma He operated in wartime when he could invoke the commander in chief clause and he created a new cultural combination in which hierarchy was subordinated to individualism This suggests the authors was a key to his greatness The unique dimension of this volume is its use of cultural theory to explain presidential behavior It also differs from other books in that it deals with pre modern presidents who are too often treated as only of antiquarian interest in mainstream political science literature on the presidency The analysis lays the groundwork for a new basis for comparison of early presidents with modern presidents

**The Presidential Quest** M. J. Heale, 1982 **The Partisan Press** Si Sheppard, 2007-11-19 This book is the first to place the contemporary debate over media bias in historical context illustrating how partisan bias in the American media has built political parties set the stage for several wars and even contributed to the rise and fall of U S presidents The author discusses the rise of the unprecedented post World War II model of objective journalism and explains why this model is breaking down under the challenge of a new generation of technology driven partisan media alternatives

**The Presidential Campaign Film** Joanne Morreale, 1996-02-16 Morreale traces the development of the documentary films produced for presidential candidates from Calvin Coolidge in 1923 to George Bush and Bill Clinton in 1992 The work provides insight into today's visually oriented presidential campaign by analyzing the

production of candidates images as the films evolve from classical to modern forms Campaign films are usually overlooked by campaign scholars yet they provide the fullest available visual portrait of a candidate during a campaign they encapsulate persuasive appeals and strategies and they illustrate Republican and Democratic candidates different approaches to mediated communication Morreale concludes that presidential campaign films provide a lens through which we can view both changes and continuities in American politics and culture Recommended for scholars and students of communication political science and history *American Studies International* ,1986 *America, History and Life* ,1984 **Celebrating the Republic** Sandra Moats,2010 From the glitz of inaugural balls to the pomp and circumstance of the State of the Union address the American presidency is rife with symbolism and ceremony In *Celebrating the Republic* Sandra Moats examines how the first five presidents with special emphasis on George Washington Thomas Jefferson and James Monroe invented the American political culture that endures today Drawing from the chaotic political culture of the founding era these presidents used symbolism to connect the national government to the people at large Their efforts defined republican government for the founding generation and those to follow Moats details the trials and errors of our founding fathers as they tried to symbolically establish the authority of the office of the president and the federal government An elaborate mechanism designed to crown Washington with a laurel wreath at his inauguration shows the struggle of early leaders to invent appropriate and inspiring signs and rituals compatible with republican ideas We now take for granted the trappings of our government but titles accessibility protocol tours and inaugurations were all topics of great debate and deliberate decision making in the early republic *Celebrating the Republic* elaborates on the stylistic differences between Washington and Jefferson and shows that John Adams and James Madison floundered while trying to develop their own styles Washington responding to the monarchical rituals instituted by the public and Congress created a ceremonial presidency complete with tours and formal receptions Jefferson rejected this in favor of an informal style and an emphasis on rhetoric and the written word rather than ritual Moats points to Monroe as an example of a leader who successfully combined elements of both the formal and the informal approaches Scholars of the early republic and the presidency as well as casual readers interested in the founding fathers will find much to enjoy in this entertaining study **Arts & Humanities Citation Index** ,1984 A multidisciplinary index covering the journal literature of the arts and humanities It fully covers 1 144 of the world s leading arts and humanities journals and it indexes individually selected relevant items from over 6 800 major science and social science journals *American Book Publishing Record* ,1982 *The Bookseller* ,1982 *American Politics and the African American Quest for Universal Freedom* Hanes Walton (Jr.),Robert Charles Smith,2003 This dynamic and comprehensive text from two nationally renowned scholars has been completely updated and demonstrates the profound influence African American have had on American politics Through the use of two interrelated themes the idea of universal freedom and the concept of minority majority coalitions the text demonstrates the profound influence African Americans have had on

American government and politics The authors show how the presence of Africans in the United States affected the founding of the Republic and its political institutions and processes from the colonial era to the present In the quest for their own freedom in the United States African Americans have universalized or expanded the freedoms for all Americans in numerous coalitions with whites minority inspired majority coalitions This is an accessible text for all students     *Subject Guide to Books in Print* ,1991     **Comprehensive Dissertation Index** ,1984 Vols for 1973 include the following subject areas Biological sciences Agriculture Chemistry Environmental sciences Health sciences Engineering Mathematics and statistics Earth sciences Physics Education Psychology Sociology Anthropology History Law political science Business economics Geography regional planning Language literature Fine arts Library information science Mass communications Music Philosophy and Religion     *Books in Print Supplement* ,1994     *Presidential Candidates* D. w. 1828-1912
