Lundy,2013-07-15 Dianne Hollis graduated from college and embarked on a quest to find two things an ideal job and the perfect man Time proved that finding either one of them was no easy task Struggling with difficult classes unpredictable students and unreliable men she managed to keep her sanity by maintaining a sense of humor and putting her trust in God Inheriting her fathers stubborn streak and her mothers strong sense of Christian faith she was determined to make it in her chosen profession no matter what it took to succeed *The Experimental Imagination* Tita Chico,2018-06-05 Challenging the two cultures debate The Experimental Imagination tells the story of how literariness came to be distinguished from its epistemological sibling science as a source of truth about the natural and social worlds in the British Enlightenment Tita Chico shows that early science relied on what she calls literary knowledge to present its experimental findings More radically she contends that science was made intellectually possible because its main discoveries and technologies could be articulated in literary terms While early scientists deployed metaphor to describe the phenomena they defined and imagination to cast themselves as experimentalists literary writers used scientific metaphors to make the case for the epistemological superiority of literary knowledge Drawing on literature as well as literary language tropes and interpretive methods literary knowledge challenges our dominant narrative of the scientific revolution as the sine qua non of epistemological innovation in the British Enlightenment With its recourse to imagination as a more reliable source of truth than any empirical account literary knowledge facilitates a redefinition of authority and evidence as well as of the self and society implicitly articulating the difference that would come to distinguish the arts and sciences
