The Politics of Structural Education Reform Keith A. Nitta, 2008-01-07 Education policymaking is traditionally seen as a domestic political process The job of deciding where students will be educated what they will be taught who will teach them and how it will be paid for clearly rests with some mix of district state and national policymakers This book seeks to show how global trends have produced similar changes to very different educational systems in the United States and Japan Despite different historical development social norms and institutional structures the U S and Japanese education systems have been restructured over the past dozen years not just incrementally but in ways that have transformed traditional power arrangements Based on 124 interviews this book examines two restructuring episodes in U S education and two restructuring episodes in Japanese education The four episodes reveal a similar politics of structural education reform that is driven by symbolic action and bureaucratic turf wars which has

ultimately hindered educational improvement in both countries

The Politics of Education Policy in an Era of

Inequality Sonya Douglass, Janelle T. Scott, Gary L. Anderson, 2024-11-06 In a context of increased politicization led by state and federal policymakers corporate reformers and for profit educational organizations *The Politics of Education Policy in an Era of Inequality* explores a new vision for leading schools grounded in culturally relevant advocacy and social justice theories This timely volume tackles the origins and implications of growing accountability for educational leaders and reconsiders the role that educational leaders should and can play in education policy and political processes This book provides a critical perspective and analysis of today's education policy landscape and leadership practice explores the challenges and opportunities associated with teaching in and leading schools and examines the structural political and cultural interactions among school principals district leaders state and federal policy actors and increasingly powerful non state actors This fully revised second edition includes questions for discussion at the end of each chapter as well as expanded discussion on critical race theory the effects on educational systems following the global pandemic the holistic needs of children including physical mental economic nutritional and emotional the impact of technology and AI book banning and the assault on school curricula in some states as well as teacher strikes and the politics of school boards An important resource for practicing and aspiring leaders *The Politics of Education Policy in an Era of Inequality* shares a theoretical framework and strategies for building bridges between education researchers practitioners and policymakers

Disability & the Politics of Education Susan Lynn Gabel, Scot Danforth, 2008 *Disability and the Politics of Education* An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All EFA and the Salamanca Statement Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community Today millions of the world's disabled children cannot obtain a basic childhood education particularly in countries with limited resources Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches

The Politics of Education Reform in the Middle East Samira Alayan, Achim Rohde, Sarhan Dhouib, 2012-06-01 Education systems and textbooks in selected countries of the Middle East are increasingly the subject of debate This volume presents

and analyzes the major trends as well as the scope and the limits of education reform initiatives undertaken in recent years In curricula and teaching materials representations of the Self and the Other offer insights into the contemporary dynamics of identity politics By building on a network of scholars working in various countries in the Middle East itself this book aims to contribute to the evolution of a field of comparative education studies in this region **Merit Aid and the Politics of Education**

Erik C. Ness,2007-11-13 While a substantial number of studies have evaluated the effects of merit aid programs there is a surprising lack of any systematic consideration of how states determine eligibility criteria for these scholarships The selectivity of merit aid eligibility criteria can be as important as whether or not such programs are adopted If for example merit aid programs have broad easily attained initial eligibility criteria then a large proportion of high school graduates including low income and under represented students will gain eligibility On the other hand if the criteria are more rigorous then a smaller proportion of students likely those already planning to attend and with the means to afford college will be eligible Thus this innovative book the first to deepen the descriptive and conceptual understanding of the process by which states determine merit aid scholarship criteria is crucial to understanding merit aid s success and failures at fulfilling the promise of education **The Politics of Performance Funding for Higher Education** Kevin J.

Dougherty,Rebecca S. Natow,2015-05-15 One of the striking ways in which state governments have pursued better performance in public higher education is through the use of performance funding Performance funding involves tying state support directly to institutional performance on specific outcomes such as rates of graduation and job placement The principal rationale for performance funding has been that the introduction of market like forces will prod institutions to become more efficient delivering more bang for the buck Kevin Dougherty an expert on state performance funding finds its development puzzling First despite the great interest in it only half the states have ever adopted performance funding for higher education Moreover of the states that did adopt performance funding over half later dropped it Finally in the states that have retained performance funding over a long period of time their programs have undergone considerable changes in the amount of state funding they devote to performance funding and in the content of the indicators they use to allocate that funding In spite of this performance funding continues to attract interest as a way of improving educational outcomes This book based on an extensive ten state study aims to shed light on the social and political factors affecting the origins evolution and demise of these programs **The Politics of African-American Education** Kenneth J. Meier,Amanda

Rutherford,2016-08-22 Based on the 1 800 largest school districts in the United States over a decade The Politics of African American Education documents the status of African American education and the major role that partisanship plays The book brings together the most comprehensive database on minority education to date that centers around three arguments First partisanship permeates African American education it affects who is elected to the school board the racial composition of school administrators and teachers and the access of African American students to quality education Second African

American representation matters The effectiveness of African American representation however is enhanced in Democratic districts while representation in Republican districts has little influence Third political structures matter but they are not determinative Two different structures election rules and the independent school district create the rules of the game in US education politics and policy but do not limit others from using those rules to change the outcome *Teacher Unions, Social Movements and the Politics of Education in Asia* John P. Synott, 2017-11-22 This title was first published in 2003 In the globalizing world South Korea is widely regarded as a model example of how a school education system can enhance national economic development Similar claims are made for other Asian NICs such as Taiwan However less understood is how the education system in South Korea became a site of intense conflict as in the decade from 1989-99 a large movement of teachers battled with the government over development related issues such as democratic reforms and human rights in schooling in a struggle that divided this education oriented society and at times plunged the nation's schools into chaos This book analyses the emergence of the National Teachers Union of Korea Chungeyo and traces its struggle for educational reforms The book examines the South Korean education system within national and global contexts and the historical experiences that have shaped the modern nation such as its Confucianist history its experiences of colonialism and the legacy of the Cold War conflict with North Korea As South Korea searches for pathways for reunification economic growth and the consolidation of democratic civil society important new perspectives on the role of education emerge through this analysis of the teachers social movement This book also presents separate chapters on teacher movements in Taiwan and the Philippines that provide interesting comparisons to the South Korean case while revealing the distinctive political and historical experiences that have shaped education in these societies and the emergence of reformist teacher movements In a valuable appendix the author discusses methodological and theoretical aspects of the research in this book **The Politics of Education** Marjorie Lamberti, 2004 Lamberti history Middlebury College examines the culture wars that took place in 1920s and 1930s Germany over issues in education She describes how innovative educators attempted to reform the stratified educational system to foster democracy and social justice She also shows the relationship between the traditionalists opposition to school reform and the attraction of certain sections of the teaching profession to the Nazi movement Annotation copyrighted by Book News Inc Portland OR **The Politics of American Education** Joel Spring, 2011-01-12 Turning his distinctive analytical lens to the politics of American education Joel Spring looks at contemporary educational policy issues from theoretical practical and historical perspectives This comprehensive overview documents and explains who influences educational policy and how bringing to life the realities of schooling in the 21st century and revealing the ongoing ideological struggles at play Coverage includes the influence of global organizations on American school policies and the impact of emerging open source and other forms of electronic textbooks Thought provoking lucid original in its conceptual framework and rich with engaging examples from the real world this text is timely and useful for understanding the big picture and the

micro level intricacies of the multiple forces at work in controlling U S public schools It is the text of choice for any course that covers or addresses the politics of American education Companion Website The interactive Companion Website accompanying this text includes relevant data public domain documents YouTube links and links to websites representing political organizations and interest groups involved in education

The Politics of Education in the New South Rebecca S. Montgomery, 2008-08-01 Alarmed at the growing poverty illiteracy class strife and vulnerability of women after the upheavals of Reconstruction female activists in Georgia advocated a fair and just system of education as a way of providing economic opportunity for women and the rural and urban poor Their focus on educational reform transfigured private and public social relations in the New South as Rebecca S Montgomery details in this expansive study *The Politics of Education in the New South* provides the most complete picture of women s role in expanding the democratic promise of education in the South and reveals how concern about their own status motivated these women to push for reform on behalf of others Montgomery argues that women s prolonged campaign for educational improvements reflected their concern for distributing public resources more equitably Middle class white women in Georgia recognized the crippling effects of discrimination and state inaction which they came to understand in terms of both gender and class They subsequently pushed for admission of women to Georgia s state colleges and universities and for rural school improvement home extension services public kindergartens child labor reforms and the establishment of female run boarding schools in the mountains of North Georgia In the process a distinct female political culture developed that directly opposed the individualism corruption and short sightedness that plagued formal politics in the New South
