Separate Destinations James G. Gimpel, 2010-05-25 Natives who change residence do not settle in the same places as immigrants *Separate Destinations* argues that these distinct mobility patterns coupled with record levels of immigration from impoverished third world nations are balkanizing the American electorate James G Gimpel examines the consequences of different patterns of movement and settlement on the politics of the communities in which these different groups settle Newer immigrants are constrained by a lack of education money English literacy and information and frequently by discrimination to live in areas of coethnic settlement Domestic native born migrants predominantly Caucasian free of discrimination and possessing more money and information move where they wish often to communities where immigrants are not welcome or cannot afford to live Strong evidence suggests that spatially isolated immigrants are slower to naturalize and get involved in politics than domestic migrants Gimpel looks closely at states with very different patterns of migration and immigration California Colorado Kansas Kentucky Florida Pennsylvania and New York In these states Gimpel shows the impact of population mobility on party registration party votes and voter turnout and asks whether population changes have changed the dominant party in a state or produced a political reaction from natives *Separate Destinations* contains a number of thematic maps detailing the settlement patterns of internal migrants and immigrants for both counties and census tracts Blending insights from a number of social science disciplines including economics demography sociology political science and anthropology this book will be of interest to a wide and diverse readership of scholars students and policymakers James G Gimpel is Associate Professor of Government University of Maryland

Migration Sarah Spencer, 2003-12-12 Drawing together key thinkers on migration this work addresses the political tensions and policy trade offs inherent in the mobility of people across national boundaries It addresses such issues as Islamophobia the rise of the far right and national security post 9 11 *The Politicisation of Migration* Wouter van der Brug, Gianni D'Amato, Didier Ruedin, Joost Berkhout, 2015-03-27 Why are migration policies sometimes heavily contested and high on the political agenda And why do they at other moments and in other countries hardly lead to much public debate The entrance and settlement of migrants in Western Europe has prompted various political reactions In some countries anti immigration parties have gained substantial public support while in others migration policies have been hardly controversial The Politicisation of Migration examines the differences between seven Western European countries by developing a conceptual framework to empirically explain patterns of politicisation and de politicisation The analyses show that over the past decade immigration has been increasingly defined in socio cultural terms and that it has been receiving less political attention since the economic crisis started in 2007 This book also looks at the role of mainstream parties and political actors in the process of politicisation and demonstrates how the role of challengers is more limited than often assumed Contributing to literatures on migration party politics and agenda setting the book will be of interest to students and scholars in the fields of politics and migration studies *International Organisations and the Politics of Migration* Martin Geiger, Antoine Pécoud, 2017-10-02 Over the last two decades international migration has become a global issue It is perceived as an ongoing challenge for governments as well as an issue that is deeply related to other international challenges such as development climate change security and public health In this context international organisations have become influential in the way in which migration is thought about and governed They play an important role steering states behaviour and intervening on the ground through the design and implementation of immigration policy International organisations tend to promote a positive view of migration extolling its benefits for all parties There often exists a contrast between this positivity and the public and political scepticism regularly expressed in Western receiving countries According to their advocates international organizations have the potential to improve the governance of migration by supporting cooperation between states and promoting balanced and comprehensive political strategies However their detractors criticise them for aligning themselves with the interests of receiving states and for their political agenda This book brings together analytical and empirical contributions that explore the role of international organisations in migration politics worldwide This book was originally published as a special issue of the Journal of Ethnic and Migration Studies *International Migration in Europe* Corrado Bonifazi, 2008 Literaturangaben

The Age of Dualization Patrick Emmenegger, 2012-01-17 Poverty increased inequality and social exclusion are back on the political agenda in Western Europe not only as a consequence of the Great Recession of 2008 but also because of a seemingly structural trend towards increased inequality in advanced industrial societies that has persisted since the 1970s How can we explain this increase in inequalities Policies in labor markets social policy and political representation are strongly linked in the creation widening and deepening of insider outsider divides a process known as dualization While it is certainly not the only driver of increasing inequality the encompassing nature of its development across multiple domains makes dualization one of the most important current trends affecting developed societies However the extent and forms of dualization vary greatly across countries The comparative perspective of this book provides insights into why Nordic countries witness lower levels of insider outsider divides whereas in continental liberal and southern welfare states they are more likely to constitute a core characteristic of the political economy Most importantly the comparisons presented in this book point to the crucial importance of politics and political choice in driving and shaping the social outcomes of deindustrialization While increased structural labor market divides can be found across all countries governments have a strong responsibility in shaping the distributive consequences of these labor market changes Insider outsider divides are not a straightforward consequence of deindustrialization but rather the result of political choice A landmark publication this volume is geared for faculty and graduate students of economics political science social policy and sociology as well as policymakers concerned with increasing inequality in a period of deep economic and social crisis
