Development, Education and Learning in Sri Lanka Angela W. Little, 2024-06-13 Sri Lanka's early achievements in education and literacy became well known among the international development community in the middle of the last century and were often used to benchmark progress elsewhere. *Development Education and Learning in Sri Lanka* presents an illuminating narrative of changing education fortunes and inequalities based on half a century of research. This research journey was undertaken in collaboration with Sri Lankan researchers island-wide in myriad communities, schools, classrooms and education offices through conversations with countless parents, teachers, students, community members, trade union officers, politicians and members of local, national and international development agencies as well as through extensive documentary analysis. The book delineates the distinctive and changing features of the Sri Lankan education system through comparisons with systems elsewhere through an understanding of national political economic and social conditions, crises and upheavals through changes in education policy and through shifting patterns of opportunity among diverse social groups. These analyses are framed by themes in the international development discourse ranging from modernisation to basic needs to globalisation and sustainable development, some of which themes have been influenced by the Sri Lankan story. The book's overriding messages are the need to understand education and development in a country's own terms and to place learning at the heart of education policy, situating it within broader conceptions of the purpose, values and means of development. Praise for *Development Education and Learning in Sri Lanka* Through rigorous and comprehensive research and a blend of local and global perspectives, this book offers invaluable insights for academics and policymakers alike. Tara de Mel, Director, Bandaranaike Academy for Leadership and Public Policy and former Secretary, Sri Lanka Ministry of Education. Reflecting on a career-long engagement with education and development, Angela Little brilliantly co-locates the personal, political and the theoretical. A privilege to read. Simon McGrath, University of Glasgow. This passionate engagement with education reform and development offers very instructive lessons for academics and policymakers in Sri Lanka and beyond. Siri T. Hettige, University of Colombo. Fifty years of personal experience in Sri Lanka from many vantage points. A focus on education and society rather than education alone. And a concern to understand rather than prescribe. This book has no competitors. Mick Moore, Institute of Development Studies, Sussex.

Local Government Board,1914 **The International Cyclopaedia** ,1892 **The Future of Singapore** Kamaludeen Mohamed Nasir,Bryan S. Turner,2014-05-09 Singapore like many other advanced economies has a relatively low and declining birth rate One consequence of this and a consequence also of the successful economy is that migrants are being drawn in and are becoming an increasing proportion of the overall population This book examines this crucial development and assesses its likely impact on Singapore society politics and the state It shows that although Singapore is a multi ethnic society migration and the changing ethnic mix are causing increasing strains putting new demands on housing education and social welfare and changing the make up of the workforce where the government is responding with policies designed to attract the right sort of talent The book discusses the growing opposition to migration and explores how the factors which have underpinned Singapore s success over recent decades including a cohesive elite with a clearly focused ideology a tightly controlled political system and strong continuity of government are at risk of being undermined by the population changes and their effects The book also compares the position in Singapore with other East Asian countries including Japan South Korea and the Philippines which are also experiencing population changes with potentially far reaching consequences **Critical Issues In Asset Building In Singapore's Development** S Vasoo,Bilveer Singh,2018-06-19 Singapore s progress as an independent nation and the uplifting of its people s livelihood have been made possible by stable social and political conditions A more important factor in driving these positive changes lies with people centric leadership One can contrast the case of Singapore with societies led by self serving leaders whose lack of honesty and integrity brings about immense social and economic hardships to various communities When people suffer under undesirable circumstances they often migrate to seek better future for themselves and their families This book reveals how Singapore s governance grounded on the principle of asset building facilitates the country s growth and development Policies being discussed in this volume include multi culturalism accessible housing social mobility for low income families water resource management and national conscription
