The Practical Guide To People Friendly Documentation Paperback:

The Practical Guide to People-Friendly Documentation Adrienne Escoe, 2001-06-30 This innovative guide brings together practical solutions to the documentation challenges faced by today's organizations. From company policies and desk instructions to Baldrige and the ISO 9000 requirements, it applies a customer and quality based systems approach to streamlining and managing your documentation system. This second edition is an organized toolbox of powerful methodology and metrics that shows companies how to steer clear of cumbersome and obsolete documentation and gives numerous examples of the tremendous opportunities and pitfalls presented by technology such as the Internet and web based documentation management software. The Society for Technical Communication (STC) awarded this book the Touchstone 2001 award. The Certified Quality Improvement Associate Handbook, Third Edition Russell T. Westcott, Grace L.

Duffy, 2014-10-01 ASQ's Certified Quality Improvement Associate (CQIA) certification is designed to introduce the basics of quality to organizations and individuals not currently working within the field of quality. This book and the Body of Knowledge (BOK) it supports are intended to form a foundation for further study and application of proven quality principles and practices worldwide. The book follows the CQIA BoK in both content and sequence. The intent is that this book will serve as a guide to be used in preparation to take the CQIA examination given by ASQ. Each chapter stands alone and the chapters may be read in any order. Some material reaching beyond the content of the BoK has been added. Supplemental reading suggestions are provided. An online interactive sample exam and a paper and pencil sample can be found on the ASQ website <http://asq.org/cert-quality-improvement-associate-prepare>.

Controlling Language in Industry Stephen Crabbe, 2017-01-30 This book provides an in-depth study of controlled languages used in technical documents from both a theoretical and practical perspective. It first explores the history of controlled languages employed by the manufacturing industry to shape and constrain the information in technical documents. The author then offers a comparative analysis of existing controlled languages and distills the best practice features of those language systems. He concludes by offering innovative models that can be used to develop and trial a new controlled language. This book will be of interest to linguists working in technical and professional communication as well as writers and practitioners involved in the production of technical documents for companies in multiple industries and geographical locations.

A Practical Guide to Supporting People with Epilepsy Rebecca Case, Sinead Blake, 2020-05-08 This book is a practical guide with rationale to supporting people with epilepsy. It encompasses epilepsy guidance such as NICE 2012 revised 2019, The Equality Act 2010, the Children and Families Act 2014, current evidence based practice and regulatory organisation standards. It is predominantly aimed at nurses and student nurses, especially those studying learning disability nursing, but also residential respite and supported living services, schools and family carers to enable them to offer appropriate and evidence based support to people with epilepsy of all ages. It is estimated there are approximately 1200 epilepsy related deaths each year in the UK. Many of these are considered to be

preventable High profile cases have led to an increase in anxiety in people providing services and greater scrutiny of those services by regulatory bodies Over the years the authors have been asked the same questions and witnessed the same misunderstandings and mistakes by people supporting individuals with epilepsy So they looked at the common themes and the resources available It became clear that the information to address these gaps is available but not easily accessible There is lots of information in the public domain however much of it is factual rather than practical This book provides practical information and resources with the focus on what needs to happen how to make it happen and who needs to do it This book is useful for supporting people with epilepsy wherever they live both within and outside the United Kingdom **Nimble**
