Abstract

Teaching practice as a vital process where learning takes place. This study aimed to examine the effective teaching practice of Malaysian secondary school teachers and how these practices differed among teaching experience groups. There were 322 secondary school teachers from Johor state, Malaysia involved in this study. Descriptive statistic and multivariate analysis of variance (MANOVA) were applied to analyse the finding. The results indicated that sampled teachers have higher scores in practising effective teacher attributes, following by teaching planning, classroom management, teaching strategy and lastly was professional responsibility. Besides, significant difference were found between teachers less than three years teaching experience with 3-5 years, 6-10 years, 11-15 years, 16-20 years and more than 20 years across five subspects of effective teaching practice.

Keywords: Effective teaching practice, Teaching experience, Secondary school teacher.

1. Introduction

Teaching always been regarded as an easy task but in fact it is complex. However, a teacher is able to contribute in shaping the future of a particular student through his/ her teaching. According Vashney (2014), teacher can helps the child in bringing out their hidden capabilities and change the fate of the nation. Meanwhile, effective teaching practice is meaningful to a teacher as well as the educational world. Effective teaching is a battle process which not only limited to deliver knowledge, skill and value for student, it also can touch the heart and soul of a student lives. Previous research has been shown that the effective teacher has an effect on student success and achievement (Marzano, Pickering and Pollock, 2001). In teaching, teachers should not only know a specific skill, instead they should practice it in the classrooms. This is called as 'knowing in action' (Fetherston, 2007). A teacher needs an ongoing development in order to fulfil or crafting the art of teaching which is complex nowadays. An effective teacher in teaching will always 'learn to teach' for upgrading the art of teaching. This spirit should always nourish in the heart of a teacher to improve teaching to the utmost potential. Although there are many factors which can affect the teacher effective teaching in school, however Linda Darling Hammond (2000) study which involved 50 states in United States found that what the student gain was depends on the teachers in the school. Once again, this highlight the fact that an effective teacher indeed has a firm affect in learning and teaching. Teacher is an important input in the process of teaching for the sake of effective teaching outcomes. This perspective is so important to survey and gain meaningful findings in maturing and upgrading teacher's effective teaching.

2. Effective Teaching Practice

A teacher's teaching life is very meaningful and challenging especially when he/she practising effective teaching throughout career. In this study, the combination of model Charlotte Danielson (2007) and James H. Stong (2007) have been used. There have five subspects in teacher effective teaching which consist of teaching planning, class management, teaching strategy, teacher attribute and professional responsibility. Teaching planning defines how a teacher designing teaching. According to Danielson (2007), planning is considered as a backstage task which organising teaching in a classroom. This effort needs high level of subject content knowledge in designing a suitable teaching for different types of students in their learning (pg.43). Classroom management also plays an important role in effective teaching. "Teachers are authority figures and need to require students to follow certain rules and procedures. However, these are means for organizing the classroom to support teaching and learning, not ends in themselves. Classroom management should help students gain capacity for self-regulation" (Goed and Brophy, 2005). Meanwhile, Stong (2007) also mention majority of the effective teaching teacher admit that they emphasis on classroom rules when start schooling in order to create a systematic class procedure which can follow by the students.

For teaching strategy, teacher must provide a clear explanation to the student as a guide to change something complex to something which is clear in a student's live (Danielson, 2007). It means without an effective delivering from a teacher, students may encounter deadlock in advancing themselves socially as well as academically (Shukla-Mehra and Albin, 2003). Besides, the aspect of a teacher's attribute can contribute to teacher happiness in a classroom. Therefore, it can affects the classroom atmosphere become more harmonious and give implication for learning and teaching take place indirectly. This is supported by Noddings (2005) who pointed out that teacher's happiness can affects the classroom climate. Teacher's happiness has much depends on a teacher's attribute which acts as a locomotive to interact with their students. Professional responsibility sub
