M. Evans, 2021-10 A Geography of the Hutterites in North America explores the geographical diffusion of the Hutterite colonies from the bridgehead of Dakota Territory in 1874 to the present distribution across North America Looking further than just maps of location this book analyzes the relationship between parent and daughter colonies as the Hutterite population continues to grow and examines the role of cultural and demographic forces in determining the diffusion process Throughout this geographical analysis Simon M Evans pays due attention to the Hutterites contribution to the cultural landscape of the Canadian Prairies and the American Great Plains as well as the interactions that the Hutterites have with the land including their agricultural success With over forty years of research and personal interactions with more than a hundred Hutterite colonies Evans offers a unique insight into the significant role that the Hutterites have in North America both currently and

Sanyal,2013-03-09

Exploring the complex arena of international planning for development has until now been uniquely the privilege of influential senior western planners This book calls into question many of their hallowed principles and much of the conventional wisdom still evident in the halls of academe At a time of increasing enrollment of foreign students in North American planning programs the emergence of a new voice has coincided with a growing skepticism worldwide about old notions of planning and development in poorer and ex colonial countries Now there is a need for brave innovations to reshape our understanding of the global crisis and the potential for progressive and democratic local solutions in both rich and poor nations alike This new voice is given expression by academics and professionals from Third World nations who received their planning education in the west and who now hold posts in major western planning schools Breaking the Boundaries presents their views and those of concerned colleagues about the need for a radically changed curriculum based on a comparative one world approach to planning education Their personal experiences as young expatriate scholars and later as teachers of both Third World and First World students in western planning schools are seen as crucial to this need for change Through candid reflections and perceptive critiques of their own field the spatial environmental social design and communications disciplines the contributors explore crucial issues in development planning from theoretical and professional practice perspectives **Rural and Urban Fringe Studies in Canada** Kenneth B.
