

THE PRINCIPLES OF SCIENTIFIC ASTROLOGY

By William J. Tucker

Here is a treasury of scientific fact for both amateur and professional. The author, who is recognized as one of the foremost authorities on the subject of Science and Astrology on both sides of the Atlantic, discusses astrology from the scientific viewpoint, reconstructing it as a science by carefully weighing the evidence for and against it, and by revealing its scientific principles. The fascinating history of astrology is outlined from Biblical days down to modern times. The first important astrological discovery since the Middle Ages, made by the author himself, is fully discussed. Known as the Zenith System of House Division, it keeps the elliptic circle always evenly divided into twelve houses. In a captivating and fully understandable manner, the book reveals the Scientific Interpretation of a Horoscope, the Problem of the Houses, and the Scientific Method and Astrology. For every sign of the Zodiac, it contains a remarkable analysis of the effects of planetary aspects, individuality-result of solar influence, personality-result of lunar position, and temperament-result of the rising sign.
