Social Discourse and Moral Judgement Daniel N. Robinson, 1992 **Social Discourse and Moral Judgment** Daniel N. Robinson, 1992 *The Self, Relational Sociology, and Morality in Practice* Owen Abbott, 2019-10-21 Winner of the 2020 British Sociological Association Philip Abrams Prize

Providing a theory of moral practice for a contemporary sociological audience Owen Abbott shows that morality is a relational practice achieved by people in their everyday lives He moves beyond old dualisms society versus the individual social structure versus agency body versus mind to offer a sociologically rigorous and coherent theory of the relational constitution of the self and moral practice which is both shared and yet enacted from an individualized perspective In so doing *The Self Relational Sociology and Morality in Practice* not only offers an urgently needed account of moral practice and its integral role in the emergence of the self but also examines morality itself within and through social relations and practices Abbott's conclusions will be of interest to social scientists and philosophers of morality those working with pragmatic and interactionist approaches and those involved with relational sociology and social theory

Social Theorists of Morality Owen Abbott, 2025-01-29 This book provides an interdisciplinary series of essays on key social theorists of morality It explores contributions to social moral theorising made by W E B Du Bois G H Mead Jane Addams Alasdair MacIntyre Carol Gilligan Seyla Benhabib Kwame Anthony Appiah and Jonathan Haidt It thus seeks to integrate alternative voices at the foundations of sociological theorising about morality while entering into dialogues with post Enlightenment moral philosophy and contemporary moral psychology In so doing it engages with perspectives of pragmatism virtue ethics care ethics feminist critiques and moral foundations theory The essays discuss key topics in social theories of morality including moral action socialisation habit and reflexivity relationships emotion self identity racism and colonialism universalism and innateness It centres crucial but often overlooked questions of moral power and assesses the relationship between moral theorising and normative argument The essays are conjoined by a running theme of moral agency how it is constituted and how it is enacted which orientates the book's arguments and critiques

Education for Values Jo Cairns, Roy Gardner, Denis Lawton, 2003-12-16 Values in education how they are taught the ethics of teaching itself plus their role in the education of educators is an area of lively and passionate debate This book provides an essential resource of ideas issues and current practice for all those with an interest in this area of education Presenting a range of critical writing this book deals with issues relating to education in values approaches to teaching values teacher education and values research for education in values and international comparative studies Highly regarded when it was first published in hardback in

2000 the book now appears in paperback for the first time with a new introduction which updates the main ideas and themes of the book *International Handbook of Giftedness and Talent* K. A. Heller, F. J. Mönks, R. Subotnik, Robert J.

Sternberg, 2000-12-18 The first edition of this popular reference work was published in 1993 and received critical acclaim for its achievement in bringing together international perspectives on research and development in giftedness and talent. Scholars welcomed it as the first comprehensive volume in the field and it has proved to be an indispensable resource to researchers. Since the first edition the scholarly field of giftedness and talent studies has expanded and developed welcoming contributions from researchers in related disciplines. Several theoretical frameworks outlined in the first edition have now been empirically tested and a number of new trends have emerged. The Second Edition of the *International Handbook of Giftedness and Talent* provides an invaluable research tool to academics, researchers and students interested in the field of giftedness and talent. The contributors are renowned in the field and the broad range of topics on giftedness that have been studied in the past century right up to the late 1990s are represented in this volume. It is truly international in scope bringing together leading scholars and teachers from all around the world. This new edition has been fully updated and rewritten and includes 22 completely new chapters. It provides a comprehensive review and critical synthesis of significant theory, a unique cross national perspective with contributions from over 100 distinguished authors covering 24 nations, significant contributions from scholars working in related fields, an increased focus on empirically supported scholarship and is arranged for quick and easy reference with comprehensive subject and author indexes. *Social Constructionist Psychology* David

Nightingale, John Cromby, 1999-09-16 How can ideas about the social construction of reality be reconciled with the material and embodied aspects of our being? In what ways can a realist framework inform social constructionist research? What are the limits of social constructionism? This accessible text draws together for the first time a wide range of emerging issues, ideas and discussions in constructionist psychology. It shows how these issues are relevant to everyday life using carefully chosen examples to illustrate its arguments and provides a coherent and challenging introduction to the field. The book explores the growing conviction that dominant discursive trends in social constructionism which deal with the analysis of language and discourse to the exclusion of the material world, embodiment, personal social history and power are inadequate or incomplete and risk preventing social constructionism from maturing into a viable and coherent body of theory, method and practice. In highlighting what are seen as deficiencies in current constructionist approaches it inevitably takes a somewhat critical stance. However the contributing authors are committed to a constructionist analysis of the human condition into which they seek to reintegrate the material and embodied aspects of our nature. As a result the completion of social constructionism is brought a step closer and its continued importance is underlined. Moral Judgments as Educated Intuitions Hanno Sauer, 2022-11-01

An argument that moral reasoning plays a crucial role in moral judgment through episodes of rational reflection that have established patterns for automatic judgment foundation. Rationalists about the psychology of moral judgment argue that

moral cognition has a rational foundation Recent challenges to this account based on findings in the empirical psychology of moral judgment contend that moral thinking has no rational basis In this book Hanno Sauer argues that moral reasoning does play a role in moral judgment but not as is commonly supposed because conscious reasoning produces moral judgments directly Moral reasoning figures in the acquisition formation maintenance and reflective correction of moral intuitions Sauer proposes that when we make moral judgments we draw on a stable repertoire of intuitions about what is morally acceptable which we have acquired over the course of our moral education episodes of rational reflection that have established patterns for automatic judgment foundation Moral judgments are educated and rationally amenable moral intuitions Sauer engages extensively with the empirical evidence on the psychology of moral judgment and argues that it can be shown empirically that reasoning plays a crucial role in moral judgment He offers detailed counterarguments to the anti rationalist challenge the claim that reason and reasoning play no significant part in morality and moral judgment and the emotionist challenge the argument for the emotional basis of moral judgment Finally he uses Joshua Greene s Dual Process model of moral cognition to test the empirical viability and normative persuasiveness of his account of educated intuitions Sauer shows that moral judgments can be automatic emotional intuitive and rational at the same time
