Chartres,1994-03-23 Britain in the sixteenth century appeared little different from its European neighbours and shared their renewed Malthusian pressures as population growth threatened the resource base of the economy Yet by the later seventeenth century Britain had broken the limits imposed by food production With the development of its trade transport and industry and the effective integration of its economy as a whole the country was becoming by the later eighteenth century more urban and industrial than its neighbours and was rapidly overtaking the Netherlands as the least rural country in Europe This volume of key readings sets British development in its broad context and in presenting the strong evidence of the extent and nature of its economic advance in the seventeenth and early eighteenth centuries provides the critical background for the understanding of the late process of British industrialization *ERDA Energy Research Abstracts* United States.
